

VASSAR COLLEGE

The 2018/19 First-Year Handbook

A HANDBOOK FOR THE CLASS OF 2022

To The Class Of 2022

In a few short weeks, you will join a college community of other students, faculty, and administrators who are eager to welcome you to Vassar. Countless alumni and alumnae have called their student experiences at Vassar some of the best years of their lives. We hope that you will be able to say the same in a few short years. Much will depend on the choices you make and how you handle the academic and personal challenges that you will face. Your decisions regarding your approach to both the curriculum and out-of-class engagements will be vitally important—these spheres of activity are inextricably woven into what we consider to be the whole student experience. Certainly you cannot anticipate everything, but you can plan for the expected and talk through the unexpected with any number of people who are here to do exactly that with you.

No doubt you have already begun reflecting on your own intellectual and personal goals. To be prepared to meet them, you will need to think through, plan, and carry out an academic program grounded in the broad tradition of liberal education. Our responsibility is to assist you in these tasks. Thus, the materials in this book are intended to help you make good use of the time between now and when you arrive on campus on August 27, 2018.

Recognizing that it is difficult to plan and prepare for a complex experience, we have worked carefully to assemble information in this book that will help you begin that process thoughtfully, with originality, and with confidence. You will find in these pages general statements and guidelines about the first year at Vassar and very specific statements about the philosophies and policies of all the academic departments and programs.

You will also find instructions for pre-registering for your fall semester courses. Please read and consider this material carefully. We encourage you to think about it while pre-registering for classes and preparing the Statement of Academic Interests, which the dean of first-year students has requested you send before you arrive on campus. Your understanding of the materials here, the Vassar College catalogue, and your Statement of Academic Interests will provide the basis for the important discussions that you will have with your faculty pre-major advisor, your house fellow, and the dean of first-year students when you arrive on campus in August.

We look forward to welcoming you to campus and to facilitating your smooth and enjoyable transition into the Vassar community. Personally, I look forward to working with you and the entire Vassar College Class of 2022.

Christopher Roellke

Dean of the College and Professor of Education

THE VASSAR FIRST YEAR

As you begin your first year of college, please reflect on the values of the community you are about to join, as articulated in the Vassar catalogue describing A Community of Special Character: “Vassar College seeks to sustain a community of special character in which people of divergent views and backgrounds come together to study and live in the proud tradition of a residential liberal arts college. Vassar students, working closely with the faculty, enjoy the freedom to explore their intellectual and artistic passions, to develop their powers of reason and imagination through the process of analysis and synthesis, to effectively express their unique points of view, to challenge and rethink their own and others’ assumptions, and to struggle with complex questions that sometimes reveal conflicting truths.” The full statement is printed on the inside cover of this handbook. Please read it and reflect on the goals and expectations it describes.

Vassar has set lofty goals with the confidence that our students are both able and eager to embrace the challenge. Vassar places considerable faith and control in the hands of its students, who are expected to find their own way of taking the liberal arts education offered at Vassar and making it inimitably their own. Given Vassar’s rich and varied curriculum, your education depends on the care with which you plan your academic program. Your course selections should reflect your interests and abilities, but also acknowledge that your first year of study is a time for intellectual adventurousness. We hope that in planning your fall semester courses, especially in working with your pre-major advisor, you keep an open mind, remain flexible, and identify numerous and alternative course options that take advantage of the many possibilities Vassar offers you.

GENERAL EDUCATION STUDENT LEARNING GOALS

Recently, the faculty of Vassar College endorsed General Education Student Learning Goals, which are listed below, to provide a touchstone for ongoing conversations on campus among students, faculty, and the college community about the meaning and goals of a liberal arts education at Vassar.

No one course, department, or division will address all of the goals, but they are addressed through the totality of a student’s education at Vassar. They should be interpreted broadly to acknowledge the different approaches of our myriad disciplines and the self-direction and empowerment of Vassar students to make independent choices in conversation with faculty advisors and mentors. We envisage that throughout your career at Vassar, you will aspire to achieve significantly in these four areas, although we recognize that students will not achieve all of these goals in the same way and to the same extent. These learning goals serve as resources for pre-major advising conversations and support student planning for your comprehensive liberal education.

GENERAL EDUCATION STUDENT LEARNING GOALS

1. **Independent Thinking, Creativity, and Intellectual Curiosity:** Students will demonstrate independent thinking and intellectual curiosity in their chosen field and across a broad array of disciplines.
 - Conduct original independent research using appropriate sources.
 - Identify problems or issues for which there are complex, ambiguous, or contradictory answers and create dialogs that lead to innovative solutions.
2. **Critical and Analytical Reasons:** Student will demonstrate critical and analytical reasoning across a broad array of disciplines.
 - Apply relevant criteria to create, critically analyze, interpret, or reflect ethically on a text, artwork, performance, or other product of human creativity and reasoning.
 - Make valid connections among different disciplines or distinct bodies of knowledge.
 - Demonstrate quantitative reasoning by evaluating arguments framed in quantitative or numerical terms.
 - Demonstrate scientific reasoning by applying inductive and/or deductive analysis to evaluate a hypothesis.
 - Demonstrate the ability to identify, locate, evaluate, and effectively and responsibly use information to create new knowledge and participate ethically in communities of learning.
 - Demonstrate the ability to use general or discipline-specific technologies to identify, retrieve, analyze, and communicate ideas and information.
3. **Written and Oral Communication:** Students will demonstrate proficiency in written and oral communication.
 - Construct a clear and persuasive written argument using appropriate style, structure, and voice.
 - Construct a clear and persuasive oral argument using appropriate techniques that address the needs of the audience.
 - Listen effectively.
4. **Engagement in Diversity, Inclusion and Equity:** Students will develop competencies to understand and relate to diversity so as to be fully engaged citizens who promote an equitable and inclusive society.
 - Demonstrate the ability to explain and reflect on important issues within one’s own cultural context and the cultural context of others.
 - Engage with those who differ from oneself in beliefs, behaviors, values, or views.
 - Function effectively and work collaboratively in diverse groups.
 - Build and sustain community by applying knowledge to help others.
 - Demonstrate proficiency speaking, reading, writing, and understanding a language other than English.

New Student Orientation

Classes begin this year on Tuesday, September 4. All new students are expected to arrive at Vassar on Monday, August 27, the first day of New Student Orientation. A detailed

schedule for this year’s orientation activities may be found online on the dean of first-year students website <http://dean-offirstyearstudents.vassar.edu> and at <http://newstudents.vassar.edu>.

The activities planned for the days before classes begin serve a variety of needs, social as well as academic. Academic advising and registration for classes take place throughout the week. Orientation activities include general assemblies, residence hall meetings, and discussion groups designed to ease your transition to college life and to inform you of the rights and responsibilities that come with being a member of the Vassar community.

How to Use This Handbook

This handbook is designed to help you in your orientation to Vassar. Here you will find the academic information you will need in order to register for classes, including descriptions of Vassar’s requirements and statements by academic departments and programs that will aid you in choosing your classes. You should read through the *Academic Information* and *Departments of Instruction and Multidisciplinary Programs* sections of this handbook in order to familiarize yourself with the great range of choices before you. The section on *Registration for Courses* will give you more specific information about the process by which you will pre-register for three courses over the summer. Once you come to campus, you will have the opportunity to attend the many advising sessions that are a part of orientation, and you will meet twice with your faculty advisor during orientation to add to and revise your course selections. Final registration will take place on Friday, August 31.

Only one requirement must be met in your first year: every new student is required to complete at least one First-Year Writing Seminar. Please consult the *First-Year Writing Seminars* section of this handbook for the 2018/19 offerings. The Vassar catalogue, found online, is the primary source for all information on the academic organization of the college, its requirements for graduation, course offerings, and so forth. If questions arise as you read what follows, please also consult the online catalogue.

The next section of this handbook, *Academic, Residential Life, and Extracurricular Resources*, contains a listing of the people and offices you might turn to with any questions you may have. See, too, “A Note about Ask Banner” in the *Registration for Courses* section of this handbook for information about the online system. Additional information about student life at Vassar, including a list of student organizations sponsored by the Vassar Student Association, can be found in *The Student Handbook*. You will receive a hard copy of *The Student Handbook* upon arrival on campus, but you can consult the online version over the summer. You may always call the Office of the Dean of First-Year Students at 845-437-5258 with any questions as well.

And do remember to complete your Statement of Academic Interests online by July 20, which I will use to assign you a faculty pre-major advisor.

I look forward to meeting you on August 27.

Denise A. Walen

Dean of First-Year Students and Professor of Drama

ACADEMIC, RESIDENTIAL LIFE, AND EXTRACURRICULAR RESOURCES

“Can I take that wonderful-sounding 200-level course on Asian-American literature?” “I’m running a fever and can’t get to class. What do I do?” “My roommate and I don’t seem to have hit it off. Can we switch roommates?” Questions of all kinds arise as we make our way in a new environment. Answers are readily available from a range of resources; the information offered below should help you determine where to turn with a particular question.

The Dean of First-Year Students

The dean of first-year students counsels and advises all first-year students on academic matters and oversees academic regulations as they affect new students. The dean of first-year students is a member of the faculty and serves on a number of faculty and administrative committees responsible for the welfare of Vassar students. The dean also assigns faculty pre-major advisors and co-chairs the New Student Orientation Committee.

Should you, as a first-year student, experience any personal, family, or medical difficulties that threaten to impact your academic performance, the dean of first-year students will work closely with you to help you make full use of the college’s resources and support systems and will advise you regarding the various options available to you for some form of academic relief.

Any first-year student who needs to be away from campus because of an illness or family emergency or who is considering a leave of absence or withdrawal from Vassar should consult the dean of first-year students.

Denise A. Walen is the dean of first-year students. Her office, open weekdays from 8:30 am – 5:00 pm, is located inside the Office of the Dean of Studies (Main N-128). Appointments may be made by calling 845-437-5258.

Faculty Advisors

The dean of first-year students assigns you a faculty pre-major advisor based on the interests that you list on the Statement of Academic Interests, which you will complete online. (When you declare a major, most likely in your sophomore year, you will be re-assigned to an advisor who teaches in the department or program of your major.) The first meeting for new students with their pre-major advisors is from 2:15-3:30 pm on Tuesday, August 28. This meeting provides an opportunity for you to become acquainted with your pre-major advisor and their other pre-major advisees and to discuss any questions that you might have. On Thursday afternoon, August 30, you will have an individual half-hour appointment with your advisor for final approval of your course selections before registration. Throughout the year you will need to meet in person with your advisor to obtain approval to add or drop a course, to elect a course

under the non-recorded option (NRO), to pre-register for the following semester, or to request any kind of special permission.

At Vassar, there are many people to turn to for academic advice, so you will need to take the initiative in seeking out particular kinds of information. While pre-major advisors can assist you in coordinating your individual program, no one faculty member can be expected to know everything about Vassar's vast and varied curriculum. If you need specific information about a course or a department, you should speak to the appropriate instructor or department chair. Individual teachers and department or program representatives are available in their offices both during the initial days of the semester and as the term progresses.

After orientation, it is your responsibility to schedule all appointments with your advisor. Learn your advisor's office hours and arrange to meet with him or her in advance of all pertinent deadlines. Most faculty members can be reached via email. If you are unable to reach your advisor, your instructor, or a department chair, please contact the department assistant to leave a message that you wish to make an appointment.

The dean of first-year students can answer more general questions about college policies and procedures and about your overall curricular planning throughout your years of study.

Libraries

You can find books and journals, online databases, sound recordings and music scores, documentary and feature films, rare books and manuscripts, and digital collections in the Vassar libraries. If you have difficulty finding what you're looking for (or even knowing where to start), ask for a librarian at a circulation desk or call us from the phone located in the Cornaro Room (the room with the stained glass window in the Main Library). You can also chat with a librarian virtually by clicking on the Ask a Librarian link on the library homepage (<http://library.vassar.edu>).

The Main Library also houses a 24-hour study space, the Digital Media Zone, Scholars' Studio, Matthew's Bean (a small café), the Writing Center, and the Quantitative Center. The Music Library can be found in Skinner Hall.

The Learning, Teaching, and Research Center

The Learning, Teaching, and Research Center (LTRC) is dedicated to addressing the needs of Vassar's diverse student body. Our goal is to enable students to maximize their unique educational experiences at Vassar College. We therefore provide an extensive range of academic resources that foster the fundamental aim of a liberal arts education: to facilitate the intellectual and professional growth of ethical, informed, and reflective students who can engage creatively with important social issues. The LTRC houses a peer-staffed Writing Center and Quantitative Reasoning Center, including a Supplemental Instruction Program for select quantitative analysis (QA) courses. We also

offer expert learning support with a focus on developing individual academic skills.

For more information, please visit <http://ltrc.vassar.edu>.

Community-Engaged Learning (Field Work)

Community-Engaged Learning is an experiential educational opportunity which helps to deepen classroom learning, provide experience and foster civic engagement. The Office of Community-Engaged Learning places students in a variety of agencies in Poughkeepsie, the mid-Hudson region, and New York City. Every student electing Community-Engaged Learning is sponsored by a faculty member who helps the student integrate experience with academic work. Students receive credit in the department of the faculty sponsor. Students may need a prerequisite or corequisite course in the sponsoring department. Internships during the summer may also be eligible for academic Community-Engaged Learning credit. All students are eligible to register for Community-Engaged Learning.

For more information about the range of Community-Engaged Learning placements, please visit the Office of Community-Engaged Learning in Main N-165, phone 845-437-5280, or visit <http://fieldwork.vassar.edu>. For the application process, current opportunities and forms, please visit: bit.ly/vassarocel

Career Development

The Career Development Office (CDO), located in Main S-170, supports members of the Vassar community as they explore their interests, define their career goals, and seek their next opportunity for personal growth and professional development. The CDO houses a variety of resources for locating summer and postgraduate opportunities and making connections between your college experience and the world of work. Our services and programs focus on the following areas:

- Supporting career exploration and self-assessment (defining your interests, skills, values, and goals)
- Educating about internship and job search documents, processes and strategies
- Providing resources for locating internships, summer jobs, and post-graduate opportunities
- Creating opportunities for students to engage with alumnae/i for the purpose of career connections and mentorship
- Supporting the graduate school/law school research and application process

Because life-work planning is a continual process, we offer assistance throughout your college years as well as after you graduate. First-year students are encouraged to engage with the Career Development Office early in their time at Vassar. Whether you are thinking about a summer internship, deciding on a major, or simply exploring options to gain experience, you can use the CDO's staff, resources and extensive network of alumnae/i to assist with your plans. Stop by for an appointment or to explore the career resources available.

For more information, please stop by the office (located in Main S-170), visit <http://careers.vassar.edu>, or email cdo@vassar.edu.

The Dean of Students

The dean of students has the responsibility for coordinating several aspects of the non-academic lives of Vassar students. Specifically, the dean of students oversees the following student service areas: the Counseling Service, the Health Service, Health Education, Residential Life, and Sexual Assault and Violence Prevention (SAVP). The dean regularly meets with the directors of the student services that report to her; together they establish the goals and priorities of each office. The dean oversees the student conduct system and, along with the dean of first-year students, co-chairs the New Student Orientation Committee. The dean also serves as an advocate for students and their needs.

In addition, the dean convenes weekly meetings of the Student Support Network (SSN) to coordinate helping resources for students whose behavior indicates they may be in serious trouble. The core SSN consists of the dean of students, the dean of studies, the director of residential life, and the director of counseling; other administrators are invited as appropriate.

SSN members may share information about students who appear to be in trouble (e.g., who appear to be at risk to themselves or others, whose academic situation is dire, who are experiencing significant personal problems, or whose behavior is alarming other members of the college community). The group then determines how best to support the student or students. Please note that confidential information is not shared by the Counseling Service, Health Service or the Director of Health Education.

For more information, visit <http://deanofstudents.vassar.edu>.

The Office of Residential Life

The Office of Residential Life coordinates all aspects of the residential experience at Vassar. The Residential Life staff is responsible for community development, student leadership, room assignments, residential house furnishings and equipment, health and safety in the halls, and the development and implementation of college policies. The director and associate director can be contacted at the central office in Main C-120 or by telephone at 845-437-5860.

House Fellows

House fellows are faculty members who live in the residential houses. They function as academic advisors and as members of the residential community who offer perspective and counsel. They also serve to broaden and extend the contact between faculty and students in informal and non-academic areas. House fellow interns are student leaders selected to support the programmatic endeavors of the house fellows in each house.

Student Fellows

In each house, as a part of the overall advising system of the college, student fellows serve as peer counselors to new students. Student fellows are assigned 10–12 first-year students who live near them in the residential house. There are also student fellows for new transfer, visiting, and exchange students in Cushing House. Student fellows can assist you with registration procedures and point you towards various campus resources. They are trained to assist you with any personal problems you may encounter during your first year at college. Student fellows are carefully selected for their ability to relate to others, their sense of responsibility, judgment, discretion, and maturity. They are an invaluable campus resource.

You will first meet your student fellow on Monday afternoon, August 27 with the rest of your fellow group for introductions and information about the orientation schedule. Student fellows are available as a resource and peer mentor to you throughout the entire year.

House Advisors

House advisors are full-time student affairs professionals who work and live in the houses. They serve several functions in support of residential life within the residential clusters. Acting as liaisons between the Office of Residential Life and the residential houses, house advisors also serve as an ongoing resource to house fellows, house student advisors, student fellows, and house officers. They provide valuable personal support for all residential students.

House advisors also handle a range of administrative duties in the residential houses. They monitor house improvement needs and serve as "administrator on call" on a rotating basis to respond to emergency situations campus-wide.

House Student Advisors

In each house, a house student advisor, usually a member of the junior class, works along with the house advisor and house team. House student advisors are involved in the selection, training, and advising of the student fellows in their building.

House Officers

Each residential house is governed by five elected student officers: the president, programming director, treasurer, secretary, and first-year representative. The house officers work closely with the Residential Life staff to ensure the general welfare of students and to promote a sense of community within each house.

For more information, please visit <http://residentiallife.vassar.edu>.

Counseling Service

The Counseling Service provides a variety of services to help students and the campus community handle the challenges

associated with academics, college life, and personal development. Services include short-term individual, couple and group counseling, crisis intervention, educational programs, consultation, assessment, and referral to off-campus services. Services are free for students. The Counseling Service welcomes all students and embraces a philosophy of diversity.

Counselors are trained mental health professionals who work with students to explore personal problems and concerns in a secure and private setting. Students come to the Counseling Service for a variety of reasons, including relationship problems with parents, peers, or partners; depression; anxiety; alcohol and other drug use and abuse; coming out and transition issues; campus climate concerns; identity concerns; stress; concerns about academic progress or direction; or assistance in planning for the future.

Counselors at times refer students to resources outside of the Vassar community depending on the needs of the student and the limitations of the Counseling Service. Students referred for treatment off campus may use their health insurance to defray the cost. Off campus services are the responsibility of the student and/or the student's family. Students from low income backgrounds can access the Mental Health and Wellness Fund through the Financial Aid Office to assist in paying for off campus appointment co-payments.

The Counseling Service's consulting psychiatrists are available for limited psychiatric services by referral from a counselor. If continuing psychiatric services are required, a referral is made to a private psychiatrist.

Confidentiality is a highest priority at the Counseling Service and is strictly maintained within specific legal limits. Counseling records are separate from academic and medical records at the college and are not available to college offices outside of the Counseling Service. Since email is not a secure medium and confidentiality of email cannot be guaranteed, the Counseling Service recommends that you consider this when communicating about matters of a personal or confidential nature.

The Counseling Service, located in Metcalf House, is open Monday through Friday, 9:00 am–5:00 pm during the academic year and closes during breaks and the summer. Stop by Metcalf or call 845-437-5700 to schedule an appointment.

If you are in crisis, during office hours call 845-437-5700 and explain that you need to speak to a counselor urgently. For crisis counseling after hours and on weekends, call the Campus Response Center at 845-437-7333 and request to be connected with the counselor-on-call.

Office of Health Education

The Office of Health Education (OHE) believes that health is a vital part of learning. Students ability to thrive academically and personally depends on their state of mind, body, and spirit.

The office works to provide a campus environment and range of programs where students are able to make decisions that sustain and enhance their health, prevent disease and

reduce risk behaviors. Staff develops educational programs related to aspects of student health, specifically in the areas of substance abuse prevention, nutrition, and sexual health awareness, and facilitates connections between student health needs and services provided by the college and the local community. The staff also provides support and training to student peer helper groups, including CHOICE (sexual health information), and The Listening Center (TLC).

The office, located in the Metcalf solarium, is open during the academic year and can be reached at 845-437-7769. Students should feel free to stop by to get information about health and wellness topics, meet with a wellness peer educator, or schedule a one-on-one consultation with the director of health education.

For more information, please visit <http://health.education.vassar.edu>.

The Sexual Assault Violence Prevention Office/Sexual Assault Response Team

The Sexual Assault Violence Prevention (SAVP) Office aims to prevent and respond to sexual assault, relationship abuse, stalking, and gender-based harassment through prevention education, collaboration, outreach, and advocacy.

The SAVP Director and the Sexual Assault Response Team (SART), composed of faculty, staff, and administrator volunteers, provide 24/7 support, advocacy, and information for victim/survivors of sexual and interpersonal violence. Both SAVP and SART are private resources, meaning information shared with them remains confidential unless there is a threat to individual or community safety. They are required to fill out an anonymous report form for federal Clery data, but this form does not include any of the student's identifying information. SAVP and SART are committed to a survivor-centered approach, meaning they provide information about available resources and assist students to make decisions on what feels most comfortable for them.

The SAVP office also coordinates prevention education for the campus community throughout the year. The SAVP Director and Violence Prevention Educator collaborate with a variety of on and off campus offices, as well as student organizations, to develop and implement training and violence prevention initiatives. This includes training for house teams, student-athletes, student organization leaders, employees, and first-year students during orientation.

SART advocates can be reached 24/7 by calling the Campus Response Center at 845-437-7333 and asking to speak with a SART Advocate.

The SAVP Director's office is in Metcalf Room 4 and can be reached at 845-437-7863 or savp@vassar.edu. The Violence Prevention Educator's office is located in Metcalf Room 1-C and can be reached at 845-437-7975 or savp@vassar.edu. For more information, please visit <http://savp.vassar.edu>.

Health Service

The Student Health Service, located in Baldwin House, provides medical and nursing care by qualified personnel including a physician, physician assistants, nurse practitioners and nurses. Health Service hours are 9:00 am–5:00 pm, Monday through Friday, and 12:00 noon–4:00 pm on Saturday and Sunday.

Daily clinics for nursing, medical, and gynecological care are maintained on weekdays from 9:00 am–12:00 pm and 1:00–4:00 pm. Appointments can be scheduled during office hours by calling 845-437-5800; for women's health, call 845-437-5818. After clinic hours, a nurse is present on site to see to urgent problems until 5:00 pm on weekdays and from 12:00 noon–4:00 pm on weekends. Emergencies and urgent care walk-ins can be seen immediately when the Health Service is open. When the Health Service is closed, students may access the "Night Nurse Triage" line by calling 845-437-5800. A member of the medical staff is on call outside of clinic hours.

In case of a medical emergency, call the Campus Response Center (CRC) at 845-437-7333 to dispatch either New York State certified EMTs or an ambulance.

In the medical clinics, routine primary care is offered with referral to local specialists or hospitals as needed. Health promotion and disease prevention are emphasized through a variety of programs. Gynecological services, including birth control counseling, are available for an additional fee. Similarly, medical lab testing is provided as are therapeutic medications. Some of these services and prescriptions may be provided to students at a minimal charge.

For more information, please visit <http://healthservice.vassar.edu> or email health@vassar.edu.

Office for Accessibility and Educational Opportunity

Many Vassar students need accommodations or support services because of a learning disability, AD/HD, a chronic medical condition, vision or hearing loss, a mobility or orthopedic impairment, a psychological diagnosis, or because they are in recovery for substance abuse. The Office for Accessibility and Educational Opportunity is committed to helping coordinate and provide necessary accommodations, auxiliary aids, and services to qualified students with documented disabilities to ensure equal access to and opportunity for full participation in the academic and residential life of the college.

Students in need of disability-related accommodations or services should self-identify to the Office for Accessibility and Educational Opportunity as soon as possible to request academic or residential life accommodations (preferably by June 15, 2018, for matriculation in the fall). Students must provide the college with enough time to understand their need for accommodations or services, review disability documentation that supports the request for accommodation, work to put in place approved accommodations, and, if necessary, identify alternatives or make adjustments if the requested accommodation is not appropriate, creates an

undue burden, or would result in a substantial modification to an essential requirement of a course, program, or activity. Accommodations cannot be put in place retroactively.

All accommodation and service decisions are based on the nature of the student's disability, supporting documentation, and current needs as they relate to the specific requirements of the course, program, or activity. Commonly offered accommodations and support services include:

- Exam accommodations (extended time on scheduled exams, reduced-distraction test environment, use of a computer for essay exams, etc.)
- Alternative print formats (e.g., audio files, e-text, Braille)
- Note taker service
- Modified course load
- Housing (e.g. single room, accessible room, air conditioner)
- Meal plan accommodations
- Sign language interpreters/remote closed captioning

Please contact the Office for Accessibility and Educational Opportunity to learn more about our services and to inform us about your accommodation needs or concerns. The office is open Monday through Friday, 8:30am–5:00 pm, during the academic year and by appointment during the summer. For more information, please call 845-437-7584 or visit <http://aeo.vassar.edu>.

International Services

The Office of International Services (OIS) offers a full range of resources for Vassar's community of international students and scholars. We offer advice and assistance in visa, immigration, tax, employment, cultural, and general matters. We plan and coordinate a variety of academic, cultural, and social programs to enhance the integration and success of international students and scholars. A vital part of OIS is the team of student interns it employs and who participate in all aspects of programming.

The Office collaborates with the International Studies Program, the Office of International Programs, the Vassar International Student Association, the Office of Career Development, the Vassar Student Association and a wide variety of academic departments, administrative offices, and student organizations in efforts to provide programming that speaks to the college's mission to promote a global perspective among all our students.

Intercultural competence—the ability to communicate and relate effectively and appropriately with members of another cultural background on their terms—is a necessary skill among graduates ready to join a global marketplace. Toward this end, we look both to assist international students in adjusting to and embracing a new culture and also to involve and engage all members of the campus community in events, workshops, and other opportunities to share the wealth of global perspectives and enjoy the full experience of our campus.

The Vassar Haiti Project is an official educational program out of OIS. The Vassar Haiti Project was founded in 2001 to make a difference in Haiti, to elevate the discourse

around Haitian culture and society, and to teach students how to navigate difference in multiple contexts in order to make a tangible difference in the world. Student volunteers engage with Vassar, the local and broader tri-state area communities, and Haiti to write grants, do research, make presentations, and coordinate fundraising efforts. Students have the opportunity to travel to Haiti on a cultural immersion trip where they assess on the ground progress. One of the most impactful educational outcomes is that the 100 or so student participants annually, about two thirds of which are international students, learn and receive invaluable training in the principles and practices of global citizenship. Students remain connected with the work beyond graduation, and often cite their participation as being central to and even the most important aspect of their entire Vassar experience, as well as providing tools to navigate life after Vassar. For more information, visit <http://thehaitiproject.org>.

Andrew Meade is the director of international services and an assistant dean for campus life and diversity. Please contact anmeade@vassar.edu or visit <http://international-services.vassar.edu> for more information.

Office of Campus Life and Diversity

The Campus Life and Diversity Office strives to enhance the quality of campus life for all students by advancing Vassar's mission to provide a socially responsible and inclusive education. We promote affirming communities, equity, social justice education, global citizenship, intersectional approaches to inclusion, and spiritual exploration through a variety of resources: the ALANA Cultural Center to support students of color, International Services, the LGBTQ Center, Religious and Spiritual Life resources, the Women's Center, campus dialogues across difference and community, and First Year student engagement programs.

The Campus Life and Diversity team, along with the Associate Dean of the College, works in close collaboration across offices, with faculty and other administrative resources to foster inclusive learning and living environments as integral components of a liberal arts education for Vassar students.

The division hosts Conversation Dinners, various campus dialogues, and plans the annual All College Day in February, which brings students, faculty, administrators, and staff together for discussion and dialogue. We also assist students, groups, and other offices in creating opportunities for participants from different backgrounds and perspectives to engage in dialogue. In addition, the Campus Life and Diversity division (located in Main, N-163) includes the following campus resource offices which focus on particular communities and underrepresented groups while also supporting all students:

The ALANA Center provides myriad resources and programs to enhance the campus life and academic experiences of African-American/Black, Latino/a, Asian/Asian-American, and Native American students. The center provides a comfortable gathering space and offices for student organizations that support students of color and offers

opportunities for leadership development, intra-cultural and cross-cultural dialogues, lectures, big sister/big brother and alumnae/i mentoring programs. The center, a freestanding building adjacent to the Powerhouse Theater, also catalogs cultural journals/newsletters, educational videos, career development, scholarship and fellowship information, and computing resources for academics and student organizations use.

The Office of International Services offers a full range of resources for international students and scholars, including advice and assistance in visa, immigration, tax, employment, cultural and general matters. The office, located in Main S-185, supports international students in adjusting to and embracing a new culture and also works to involve and engage all members of the campus community in events, workshops, and other opportunities to share the wealth of global perspectives and experiences.

The LGBTQ and Gender Resources Office oversees the LGBTQ Center and the Women's Center. The LGBTQ CENTER, located in College Center 213, is a place for lesbian, gay, bisexual, transgender, queer, questioning, and ally students to relax, socialize and learn. The center hosts discussions, lectures, social events; provides meeting space for various student organizations; and has a robust library of LGBTQ-related books. The WOMEN'S CENTER is located in College Center 235 and offers a community space and programming on various components of gender equity, women's leadership, empowerment, and health. The Women's Center Student Advisory Board—which consists of 8 to 10 female-identified student leaders—acts as a think tank to the center, helping to devise new programs and initiatives.

The Office of Religious and Spiritual Life (RSL) provides programming and support for 10 different student religious groups at Vassar, supports a wide range of religious and civic communities and initiatives on campus, and plays an important role as a college liaison to the mid-Hudson Valley community. RSL staff members are available for pastoral counseling and spiritual guidance for any concern or question students may have. The RSL staff includes a full-time director for Jewish Life and part-time affiliate advisors for the Episcopal, Roman Catholic, and InterVarsity communities on campus. RSL is located in the Chapel tower and basement, as well as at the Bayit, Vassar's home of Jewish campus life, at 51 Collegeview Avenue.

Bias Incident Response Team. The Campus Life and Diversity Office coordinates a response team which may be convened in response to bias-related incidents and situations that may impact campus climate. The associate dean of the college for campus life and diversity coordinates the team and, when possible, convenes a core team to follow up on reports to determine initial steps and to identify additional offices or members from the campus community who can assist with the college's response. The team includes various administrators and a student representative.

For more information about the Office of Campus Life and Diversity, please visit <http://campuslifeanddiversity.vassar.edu>.

Student Employment

Student Employment, located in Student Financial Services, Main S-199, helps students secure part-time on-campus employment in departments throughout the college as well as part-time off-campus community service work study employment. Students who qualify for work study receive first priority consideration for campus jobs. Remaining jobs are available for any student who wishes to work. In general, first-year students work an average of eight hours per week, sophomores nine hours, and juniors and seniors ten hours. Students may choose to work fall semester, spring semester, or the entire academic year. Job registration for the academic year begins in late summer. Registration for break (i.e., winter, spring, summer) positions takes place several times throughout the year. Prior to beginning work at Vassar, students must complete I-9 and W-4 forms.

For more information, please visit the Student Financial Services website at <http://studentfinancialservices.vassar.edu/jobs/>, which will provide all Vassar student employment related resources, or email stuemp@vassar.edu.

Athletics and Physical Education

FACILITIES

The Athletics and Fitness Center (AFC) is a 53,000-square-foot facility that houses a 1,200-seat gymnasium that is the home to the men's and women's basketball programs. An elevated running track, a 5,000-square-foot training and cardiovascular facility, a multipurpose room, locker facilities, administrative offices, and a laundry/uniform room are also located in the AFC.

Walker Field House, a 42,250-square-foot facility adjacent to the AFC, features a six-lane swimming pool with a separate diving well and a field house boasting an indirectly lit, multipurpose playing surface that can be configured as five indoor tennis courts, basketball or volleyball courts, and a practice and competition site for the fencing programs. The building also has additional locker rooms and a sports medicine facility. Walker Field House is home to the men's and women's swimming and diving teams and the men's and women's fencing teams, serves as a practice site and intramural site, and hosts most physical education classes throughout the year.

Kenyon Hall contains six international squash courts, a volleyball facility with a Sport Court™ playing surface, a varsity student-athlete weight room, a satellite athletic training facility, locker rooms, and coaches' offices. Kenyon Hall is home to the men's and women's squash and men's and women's volleyball teams.

On-campus outdoor facilities include a nine-hole golf course (reduced rates for Vassar students, faculty, and staff), 13 outdoor tennis courts, and numerous playing fields. The **Prentiss Sports Complex** has a quarter-mile, all-weather track that surrounds a turf field for field hockey and women's lacrosse, a competition grass lacrosse/soccer field, and a baseball field as well as three grass practice fields. The **J.L. Weinberg Field Sports Pavilion** includes six locker rooms,

an athletic training facility, and a laundry facility. The Vassar College Farm features a rugby field and practice grids and is home to the men's and women's cross-country running course.

COMPETITION

Varsity/NCAA Sanctioned. The college supports 23 varsity teams. There are sports programs for both men and women in basketball, cross-country, fencing, lacrosse, soccer, squash, swimming and diving, tennis, track and volleyball. The women's program also includes field hockey and golf, and the men's program includes baseball. Students expecting to try out for an intercollegiate sports team need an on-campus medical examination arranged through the athletic trainers (845-437-7843). This examination must take place prior to participation in any practices. Contact the Department of Athletics and Physical Education (845-437-7450) with any questions concerning participation in varsity sports. Practices for some fall sports may begin prior to classes. Please call the office for further information.

Varsity Club Rugby and Rowing. Men's and women's rugby and rowing are varsity club sports under the auspices of the Director of Athletics and Physical Education. Participation in these programs requires a participation fee and an on-campus medical examination arranged through the athletic trainers (845-437-7843). Contact the Department of Athletics and Physical Education (845-437-7450) with any questions concerning participation in these programs.

RECREATION

Our **Intramural Program** offers various leagues and tournaments to the whole Vassar community. Some of the sports offered throughout the academic year include indoor soccer, outdoor soccer, flag football, 3 on 3 basketball, 5 on 5 basketball, volleyball, wiffleball, badminton, floor hockey, kan jam, golf, tennis, ultimate frisbee, kickball, softball, table tennis and more. All registrations are done through IMLeagues.com/Vassar and you can follow us on Twitter at [@VassarRec](https://twitter.com/VassarRec) or on Facebook at facebook.com/vassarrecreation. Please contact Mike Callahan at 845-437-7471 or at micallahan@vassar.edu for additional information.

Our **Life Fitness Program** offers more than 40 hours of non-credit fitness classes in many areas each week, including strength training, Pilates, judo, self-defense, yoga, and non-contact boxing. All Life Fitness classes are free for Vassar students. We also offer free stress buster classes at the end of each semester. Registrations are required for all Life Fitness classes and are done through IMLeagues.com/Vassar; you can follow us on Twitter at [@VassarRec](https://twitter.com/VassarRec) or on Facebook at facebook.com/vassarrecreation. Please contact Mike Callahan at 845-437-7471 or at micallahan@vassar.edu for additional information.

ACADEMIC INFORMATION

This section of the handbook contains information you will need as you decide on the courses you would like to take in your first semester. As you look through these pages of academic information and the descriptions of departments and programs, do remember some of the goals and purposes of your education. To quote the Vassar mission statement, the college aims to provide an education “that inspires each individual to lead a purposeful life. The college makes possible an education that promotes analytical, informed, and independent thinking and sound judgment; encourages articulate expression; and nurtures intellectual curiosity, creativity, respectful debate and engaged citizenship.”

At the end of this section you will find the instructions for registration. Before you go to register, however, please read what follows carefully. You can also consult the Vassar catalogue online at <http://catalogue.vassar.edu> if you have any further questions.

There are four Vassar graduation requirements beyond those in your major:

First-Year Writing Seminar Requirement

All entering first-year students are required to complete at least one First-Year Writing Seminar during the first two semesters of study. The First-Year Writing Seminars provide entering students the opportunity to develop as critical thinkers in a small class setting along with fellow first-year students who are making the transition to college work. These courses, offered in a variety of disciplines, are limited to first-year students and have a maximum enrollment of 17. Particular attention is given to writing as an intellectual process as well as the effective expression of ideas in both written and oral form. Please consult the section on *First-Year Writing Seminars* in this handbook for the 2018/19 offerings.

Quantitative Course Requirement

Facility in quantitative reasoning is an important component of a liberal education. Quantitative reasoning includes the ability to understand and evaluate arguments framed in quantitative or numerical terms, to analyze subject matter using quantitative techniques, to construct and evaluate quantitative arguments of one’s own, and to make reasoned judgments about the kinds of questions that can be effectively addressed through quantitative methods.

Accordingly, all Vassar students are required before their third year to complete at least one unit of course work that shall develop or extend the student’s facility in quantitative reasoning. Qualifying courses are designated by the faculty and are noted in the schedule of classes. Exemption from this

requirement may be granted to students who have completed equivalent coursework as certified by the dean of studies.

Courses that fulfill the quantitative requirement are marked in the schedule of classes with a QA. Select “Quantitative Analysis” from the “Select a Course Type” drop-down menu in the online schedule of classes to list all such courses.

Foreign Language Proficiency

Recognizing the unique importance in undergraduate education of the study of foreign languages, the Vassar curriculum provides for both study of and concentration in Chinese, French, German, Greek, Italian, Japanese, Latin, Russian, and Spanish. In addition, students may learn Arabic, Hebrew, Korean, Old English, and, through the self-instructional language program, American Sign Language, Hindi, Irish, Portuguese, Swahili, Swedish, Turkish, and Yiddish.

All three- and four-year students whose first language is English are required before graduation to demonstrate proficiency in a foreign language. Departmental proficiency examinations will be given in the afternoon on the first day of classes in the fall semester; the exact time and locations will be listed in the orientation schedule. Other methods by which you may meet this requirement are listed in the section on *Registration for Courses*.

Distribution Requirements

All Vassar students are expected to reflect both depth and breadth in their course selection. Depth is demonstrated by completing a major field of concentration; breadth is demonstrated by taking courses across the four curricular divisions—arts, foreign languages and literatures, social sciences, and natural sciences—and in multidisciplinary programs. In order to graduate, you will be required to elect at least 50% of your work outside of your major, and 25% of your work outside the division in which you major. For example, a history major must complete at least 17 of the 34 units in courses outside of the History Department, and 8.5 of the 34 units in courses not in the social sciences. Advanced Placement credits are not permitted to count toward fulfillment of the distribution requirement. You should also be aware that all candidates for Phi Beta Kappa honors must demonstrate breadth and substance of course work outside the major in addition to overall academic excellence. You should not take two courses in a single department in the same semester in your first year. As you consider your course selections for your first two years, you should be sure to include introductory work in any department or program in which you might major. All students must declare a major by the end of their fourth semester; applicants for Junior Year Abroad must declare by December of their sophomore year.

Pre-Matriculation Credit

Pre-matriculation credit may be awarded for college-level work completed before a student has matriculated at Vassar. The category of college level work is a broad one that includes:

1. Exams such as the Advanced Placement exams (APs) and the International Baccalaureate (IB). Vassar also recognizes GCE/Cambridge Advanced Level examinations (A Levels), the French Baccalaureate, the German Abitur, and the Caribbean Advanced Proficiency Examination (CAPE). A maximum of 4.0 units of exam-based pre-matriculation credit will be awarded.
2. College or university courses completed while a student was attending high school. Students may not apply for transfer credit for these courses until after they matriculate and are active students at Vassar. A maximum of 8.0 units of credit will be awarded for college or university courses taken before enrolling at Vassar.

A total of 8.0 units of pre-matriculation credit of any type will be awarded. This can consist of 8.0 units of transfer credit from college courses taken prior to matriculation, or some combination of transfer credits and exam-based credits. However, no more than 4.0 units of exam-based credit can count towards the total of 8.0 units.

Any questions about pre-matriculation credit should be directed to the Office of the Dean of Studies (845-437-7553).

CREDIT FOR COLLEGE WORK DONE PRIOR TO MATRICULATION AT VASSAR

Although many colleges and secondary schools offer programs in which students may earn credit toward a college degree, not all of these programs meet Vassar’s criteria for transfer. College courses taken while a student is still attending secondary school must be taught on a college or university campus with other undergraduate students and taught by a qualified college teacher. Programs in which college instructors teach the course at the secondary school will not be considered for transfer credit. Credit for these courses cannot be transferred into Vassar if they are granted high school credit or used to fulfill any high school graduation requirements. Credit will be granted only for course-work completed on a college or university campus along with other undergraduates, taught by a qualified college teacher, not taken as part of a dual-enrolment program, and neither granted high school credit nor used to meet high school graduation requirements.

Students may not apply for transfer credit for these courses until after they matriculate and are active students at Vassar. The minimum grade required for any course to be eligible for transfer credit is C.

EXAM-BASED PRE-MATRICULATION CREDIT

AP Credit

If you have taken CEEB Advanced Placement examinations, you may be eligible for college credit. Your advanced placement score(s) must be sent directly to the Office of the Dean of First-Year Students from Advanced Placement Services, Box 6671, Princeton, N.J. 08541-6671 (telephone 609-771-7300). All scores should be sent within the first month of your first year.

The general policy: Students will receive 1.0 unit of pre-matriculation transfer credit for every score of 4 or 5, subject to the maximum of 4.0 units of exam-based pre-matriculation credit. Admission into higher level courses on the basis of AP credit is at the discretion of the individual department.

Please refer to the *Departments of Instruction and Multidisciplinary Programs* section of this handbook for department specific AP information.

Note: Scores will not appear on the transcript for Advanced Placement credit, only the department, exam name, and units transferred.

The following departments offer exams for credit for those students who do not receive AP credit: Italian, Mathematics, Music, and Russian Studies. Please contact the department for information on the scheduling of their exam.

International Baccalaureate Program (IB)

The International Baccalaureate Program is described as a “demanding pre-university course of study that leads to examinations; it is designed for highly motivated secondary school students and incorporates the best elements of national systems without being based on any one.” Scores achieved for the Higher Level examinations are eligible for pre-matriculation transfer credit. Students who achieve a score of 5, 6, or 7 on an IB exam will receive 1.0 unit of transfer credit, subject to the maximum of 4.0 units of exam-based pre-matriculation credit.

Other International Exams

Entering first-year students who have taken A-level examinations, the French Baccalaureate, the German Abitur, or the Caribbean Advanced Proficiency Examination (CAPE) should consult the Office of the Dean of Studies in September to discuss the possibility of transfer credit.

Advanced Course Placement

Each department decides how much advanced standing a student who has taken AP or done other substantial work in that field will receive. Advanced course placement advising will be done as part of the academic advising sessions in the academic departments and programs on Thursday morning, August 30. It is crucial that students attend these advising sessions to receive proper placement in courses.

If you feel that you might be eligible for advanced course placement in a particular department, you can also contact the chair of the department. If you have any questions for

specific departments prior to your arrival on campus, we recommend that you contact the appropriate department chairs by email rather than try to call them, as most academic department offices are closed for the summer.

Some departments give examinations for placement or credit or both. All examinations are offered either over the summer or in the first month of the fall term and may be taken in the first year only.

Preparation for Teacher Certification

The teacher preparation programs in the Department of Education reflect the philosophy that schools can be sites of social change where students are given the opportunity to reach their maximum potential as individuals and community members. Vassar students who are preparing to teach work within a strong interdisciplinary framework of professional methods and a balanced course of study in a selected field of concentration leading to the degree of bachelor of arts. In addition to a degree in an academic discipline, they may also earn initial New York State certification at the childhood and adolescent levels. The certification is reciprocal in most other states.

Consistent with New York State requirements, the certification programs are based upon demonstration of competency in both academic and field settings. It is advisable that students planning to obtain childhood or adolescent certification consult with the Education Department during their first year.

For a full statement of the certification requirements and recommended sequences of study, please see the "Department of Education" section of the catalogue and on the web at <http://education.vassar.edu>. Enrollment in the courses listed is not limited to those seeking certification.

Vassar also offers a major and correlate in Educational Studies and a study away opportunity. Please see "Education" in the section on *Departments of Instruction*, later in this handbook, for more information.

Preparation for Law School

At Vassar, pre-law advising is handled by Mario Roman, Jannette Swanson, and Stacy Bingham in the Career Development Office (CDO), with faculty support from Professor Jamie Kelly in the Philosophy Department. Students interested in law-related careers should seek out these advisors to discuss any questions they have with respect to pre-law studies and the law school application process.

Although Vassar has designated advisors for students interested in law school and a legal career, it does not recommend a special pre-law curriculum. Unlike medical school, there are no specific courses required or suggested for entry into law school. Instead, law schools want students with a broad liberal arts education and a demanding major, not those who have taken a particular series of courses. A broad education means selecting courses from a variety of curricular divisions and departments. Just as there is no

specific group of courses to take to prepare for law school, there is no single discipline in which students should major.

The CDO has a variety of resources available to help students explore their interest in legal careers. Additionally, the office can help students connect with law-related summer opportunities and alumnae/i working in the field of law.

For more information, please stop by the office (located in Main S-170), visit <http://careers.vassar.edu>, or email cdo@vassar.edu.

Preparation for Medical School

A student interested in medical school may major in any field. The basic requirements for medical schools and other health professional schools include one year of the following subjects: biology, general chemistry, organic chemistry, and physics. Science courses must have a laboratory component. A year of English and a year of mathematics, usually calculus and/or statistics, are strongly recommended and sometimes required. Courses in psychology and sociology are also strongly recommended. Pre-med students are therefore advised to elect an English course in their first year, as well as a science sequence of some sort. Medical schools require grades in the core courses, so extra caution and careful consultation is needed if a student is considering an NRO election in any of these courses.

Students who are considering a science concentration should consult the individual departments and programs and read "To Prospective Science Majors" in the *Registration for Courses* section. For more specific advice on planning a first-year program, refer also to the "Medicine" section of *Preparation for Graduate Study* in the Vassar catalogue. It is important to know that preparation for many of the health professions does not demand a natural science major. Most often, the best advice we can offer is that students select the major field of study that most interests them because they will be happier and thereby increase the likelihood of a strong academic record.

If you are considering a career in the health professions (medical, dental, veterinary, public health), you should plan to attend the meeting held by the pre-health advisors on Thursday morning, August 30. Careful planning of the first academic year is essential. Students should call the Office for Fellowships and Pre-Health Advising, located in Main N-162 (845-437-5263), to schedule an appointment with a pre-med advisor if they cannot attend the meeting and feel that they need additional guidance before making a final selection of courses for the first term.

For more information, please visit <http://fellowships.vassar.edu/health/>.

Preparation for Study Abroad

If you are considering spending a term or your entire junior year studying abroad, you should give serious consideration to your course selections starting in your first year. If you are considering a non-English-speaking country, foreign language study is of the utmost importance and should be considered early in your academic career. Students must demonstrate on their application that they have acquired

sufficient area studies coursework to support their academic proposals for learning abroad.

Vassar College study abroad is based on a home tuition policy and your financial aid "travels" with you. Further information on financing and planning study abroad can be found on the Office of International Programs website <http://jya.vassar.edu>. You are welcome to stop by the office located in Main N-173 during open drop in hours, or you can make an appointment with the director of the Office of International Programs by calling 845-437-5260.

For more information on approved programs as well as a copy of *Fundamentals of Study Abroad*, please visit the OIP website at <http://jya.vassar.edu>

REGISTRATION FOR COURSES

During the summer, you will pre-register for three of your fall 2018 classes by using the electronic pre-registration form, which can be found at newstudents.vassar.edu. In order to complete this form, you will need to consult:

- 2018/19 catalogue found at catalogue.vassar.edu
- The First-Year Handbook
- electronic schedule of classes found at newstudents.vassar.edu.

Submit the pre-registration form electronically as soon as possible, and no later than July 20. Please be sure to pay careful attention to the information given on the Schedule of Classes Information Pages, available as a link from the online schedule of classes.

The procedures for enrolling in your fall semester classes are as follows:

1. **Summer Pre-registration.** Over the summer, you will pre-register for three of your academic classes. Once you arrive on campus for New Student Orientation, you will complete your schedule with the help of your faculty advisor. In Part I of the summer pre-registration form, list your first choice for a First-Year Writing Seminar, as well as three alternate First-Year Writing Seminars in case your first choice is unavailable. Please choose only courses being offered in the fall. In Part II, list other courses you would like to take, in order of preference. You may list as many courses as you like in this section. By the end of summer pre-registration, most first-year students will be enrolled in a First-Year Writing Seminar and two additional one credit courses (or 1.5 credits if electing elementary Chinese or Japanese). If there are no seats available in any of the First-Year Writing Seminars you have selected, the Registrar will attempt to place you in three of the courses listed on Part II of the pre-registration form. You will receive notification of the results of pre-registration during New Student Orientation.
2. **Registration during Orientation.** As indicated on the orientation schedule, there are a number of events planned to help you complete your class schedule. On Tuesday, August 28, you will meet with your faculty advisor in small groups to discuss your course selections. On Wednesday, August 29, faculty will give research presentations and departments will hold open houses. On Thursday morning, August 30, you will be able to consult with any department or program about appropriate course selections including advanced course placement or special permission. There will be special advising sessions devoted to pre-law, pre-health, teacher certification, English, art, and math and sciences. Thursday afternoon has been set aside for you to meet individually with your faculty advisor. After gathering the necessary information and making additions and revisions to your course selections, all first-year students will officially register for fall courses on Friday, August 31.

3. **Add Period (through September 11).** Once classes begin, you may continue to add courses, up to a maximum of 5.0 units, to your schedule until Tuesday, September 11. Students need both their instructor's and their advisor's permission to add a class during the add period. Under no circumstances are first-semester first-year students granted permission to exceed 5 units. All students must be registered for the minimum of 3.5 units by September 11.
4. **Drop Period (through October 12).** Students may drop courses (but not below 3.5 units) with their advisor's approval until Friday, October 12. A copy of your final registration will be available online at Vassar's website via Ask Banner for your viewing after October 12. Be sure to review it carefully and report any errors to the Registrar's Office immediately. You will be held responsible for all courses listed on this schedule and will not receive credit for any course or section in which you are not officially enrolled.

Guidelines for Course Selection

First-year students are strongly encouraged to take 4 or 4.5 units in their first semester (full-time enrollment is between 3.5 and 5.0 units). Vassar offers a limited number of half-credit courses, mostly in the departments of music and physical education. You will need to consult the schedule of classes on the newstudents.vassar.edu website for a thorough listing of these and the few half-credit academic courses offered in the fall semester. The elementary language courses in Chinese and Japanese grant 1.5 units per semester. During summer pre-registration, you may attempt to enroll in a maximum of 3.0 units (or 3.5 if electing elementary Chinese or Japanese).

Vassar strongly recommends that students take courses in each of the four divisions (Arts, Foreign Languages and Literatures, Social Sciences, Natural Sciences). Students are also expected to work in more than one department each semester.

In addition, please keep these three specific requirements in mind when selecting your first-year courses:

1. **First-Year Writing Seminar Requirement.** All students must successfully complete a First-Year Writing Seminar within the first two semesters of study; please consult the section on *First-Year Writing Seminars* in this handbook for the 2018/19 offerings. Courses are offered in both fall and spring semesters, with the far greater number in the fall.
2. **Quantitative Analysis Requirement.** All students are required before the beginning of their third year to complete one unit of course work requiring the learning and practice of a significant amount of quantitative analysis through the semester. Exemption from this requirement is limited to students who have completed equivalent coursework at another college or university as certified by the dean of studies. Courses that satisfy this requirement are designated QA in the schedule of classes. Select "Quantitative Analysis" from the "Select a Course Type" drop-down menu in the online

schedule of classes to list all such courses. For descriptions of these courses, please consult the relevant section of the catalogue.

3. **Foreign Language Proficiency Requirement.** This requirement applies to all entering first-year students whose first language is English; if your first language is not English, you will need to apply to the Office of the Dean of Studies once you are on campus to confirm your exemption. (Exemptions may be granted to students who have done literature or language study in their first language at the secondary school level.) Many first-year students will have already demonstrated proficiency by reporting a score of 4 or 5 on an AP exam or of 600–800 on an SAT II test in a foreign language. If you have Higher Level IB credit in a foreign language, please consult with the Dean of Studies Office. For the rest of you: although this is a graduation requirement, we strongly recommend that you complete it early in your Vassar career. "Proficiency" at Vassar is the level achieved at the completion of the elementary course. Consequently, you must successfully complete a full year at the introductory level or a semester at the intermediate level to demonstrate proficiency.

Please note that if you are considering applying to a non-English-speaking country for junior year abroad, you will need to have completed, by the end of your sophomore year, at least a full year at the intermediate level of the appropriate foreign language.

Proficiency can also be demonstrated by passing an exam prepared by Vassar faculty. Proficiency exams in Ancient Greek, Chinese, French, German, Hebrew, Italian, Japanese, Latin, Russian, and Spanish will be given on Tuesday, September 4, the first day of classes in the fall semester. Check the orientation schedule for times and locations. Students who are continuing a language studied prior to Vassar are placed at the level appropriate to their previous training. To identify the appropriate level for you, please consult the guidelines given by the various language departments in the section on Departments of Instruction in this handbook. Additional placement advising will be given by the foreign language faculty during orientation. First-year students are not encouraged to take two elementary level foreign languages.

To summarize: All students whose first language is English are required before graduation to demonstrate proficiency in a foreign language by one of the following six ways:

- a. one year of foreign language study at Vassar at the introductory level or one semester at the intermediate level or above;
- b. the passing of a proficiency examination administered by one of the foreign language departments, the Self-Instructional Language Program, or, for languages not in the Vassar curriculum, by the Office of the Dean of Studies;

- c. an AP exam score of 4 or 5 in a foreign language;
- d. SAT II achievement test score in a foreign language of at least 600;
- e. equivalent foreign language coursework completed at another institution; such courses may involve languages not taught at Vassar; or
- f. completion of Old English and Beowulf (English 235 and 236); both Old English and Beowulf must be completed to satisfy the requirement.

To Prospective Science Majors

A student who is thinking of a major in one of the natural sciences should consider electing two science courses in the first semester. Several natural science departments require work outside the department in order to complete the major. For example, a major in biology requires Chemistry 108/109 or 125, and 244; a major in chemistry requires Math 121 or 126/127 and Physics 113/114. Not all introductory courses in the natural sciences have laboratory components; consult the course descriptions in the catalogue. Your first semester should also include at least one course outside the Natural Sciences division.

Yearlong Courses

Most courses open to first-year students are semester-long classes, with "a" courses offered in the fall, "b" courses in the spring. All elementary foreign language courses, however, are yearlong (for example, French 105-106). As with all "hyphen" courses, you must successfully complete the second semester to receive credit for the first. Another yearlong course open to first-year students is Art 102-103. Yearlong courses are designated with a YL in the schedule of classes. The following "slash" courses are year-long sequences; while you must take the first semester to qualify for the second, you do not need to take the second to receive credit for the first: Chemistry 108/109 and Music 105/106. Students who fail the first semester of a "slash" course may not enroll in the second semester without permission from the department chair.

Please note that some yearlong courses are "provisionally graded." This means that, in the words of the catalogue, "the final grade received at the end of the year automatically becomes the grade that will be recorded on the student's transcript for both the first and the second semester." Italian 105-106, for example, is provisionally graded; if a student receives a C in the first semester and an A in the second, two credits of A will appear on that student's transcript at the end of the first year. A student who elects to take a provisionally graded course under the non-recorded option must take both semesters on this basis. Provisionally graded courses are marked in the schedule of classes with a PR.

About Grades

Final grades are released to students electronically by the Office of the Registrar at the conclusion of each semester. Copies of a student's transcript are made available to the student's faculty advisor (to assist with advising) and the

Dean of Studies Office. Any other request to see a student's grades must be accompanied by written permission of the student.

Pre-matriculation work completed at another institution (including AP credit) and accepted for application towards the Vassar degree is recorded only as units of credit; that is, the grades do not transfer for calculation in the Vassar grade point average. All post-matriculation transfer credit will be listed on the Vassar transcript along with the grades earned at the home institution. However, in all cases, only Vassar work will be computed into the Vassar cumulative grade point average.

There are two types of nongraded Vassar work: a) courses which the faculty has designated as ungraded (grades are Satisfactory, Unsatisfactory, or, for independent work, Distinction); and b) courses that are normally graded but which the student elects to take under the non-recorded option. For an explanation of the non-recorded option (NRO), please see "General Academic Regulations and Information" in the *Degrees and Courses of Study* section of the catalogue. The schedule of classes indicates which courses may be taken NRO. The total number of NRO units may not exceed 4. For transfer students, this limit is reduced by 1 unit for each year of advanced standing awarded to the student. The total number of ungraded units may not exceed 5. For transfer students, this limit is reduced by 1 unit for each year of advanced standing awarded to the student. This ungraded limit does not apply to any units taken in excess of the 34-unit minimum required for graduation.

The non-recorded option has been approved by the faculty to permit students to elect courses that may be outside their primary fields of interest without penalty of a low grade. Since first-year students are in the process of defining their principal fields of interest or expertise, faculty advisors often recommend that students not take courses NRO during their first year. All NRO elections must be approved by the faculty advisor and filed with the registrar by the end of the first six weeks of classes (in the fall, October 12, the same date as the drop deadline).

Although official grade reports are issued only at the completion of each semester, instructors are encouraged to notify the Dean of Studies Office of any students who are performing below satisfactory (C) level at any point during the semester. Class deans and advisors may request a conference with these students to discuss their academic progress.

At the end of each semester, the Committee on Student Records reviews the performance of all students with an unsatisfactory record, including any student with one F, two Ds, or a term or cumulative grade point average below 2.0. (Students cannot graduate with a cumulative or major GPA below 2.0.) These students are placed on academic probation, and the committee may recommend or require a leave of absence or a withdrawal from the college as well. First-year students who at the end of the year have a grade point average of 1.5 or below usually may not return the following year. A student remains in good academic standing (and is eligible to apply for financial aid) as long as he or she is matriculated at Vassar and is considered by the committee to be making satisfactory progress towards the degree.

The principal causes of unsatisfactory performance at Vassar are irregular class attendance and the late submission of written work. Although there is no college-wide attendance policy, individual instructors and departments have instituted attendance policies, and these policies can directly affect a student's grade.

Now It's Up to You!

You are now ready to begin to complete the summer pre-registration form. The electronic schedule of classes on the newstudents.vassar.edu website lists all the fall semester courses that are open to first-year students without special permission—that is, all 100-level courses plus those 200-level courses in the foreign languages, mathematics, etc., in which you can place yourself based on your high school background. These courses are the only ones first-year students can elect during summer pre-registration. When you get to campus, you can consult a complete online schedule of classes for the fall semester via Ask Banner. If you have any questions about completing the pre-registration form, you may call the Office of the Dean of First-Year Students (845-437-5258) weekdays during summer office hours (8:30am–4:30pm, EST).

A Note about Ask Banner

Ask Banner is a link on the Vassar homepage under the Resources tab that will give you access to a wide range of important information (<https://aisapps.vassar.edu/askbanner/>). The General Information link on the Ask Banner site will allow you to view the online schedule of classes (<https://aisapps.vassar.edu/askbanner/geninfo.html>) as well as the employee and student directories (<https://aisapps.vassar.edu/directory/studir.php>). The Student and Financial Aid link on the Ask Banner site will allow you to access personal information such as your schedule, transcript, and billing information (<https://aisapps.vassar.edu/askbanner/stuinfo.html>)

FIRST-YEAR WRITING SEMINARS

Every entering first-year student is required to elect a First-Year Writing Seminar. These courses are available only to first-year students, have a maximum enrollment of 17 and are offered by a number of departments. The First-Year Writing Seminar introduces students to critical reading and persuasive writing at Vassar, and helps them make the transition to college-level writing. These courses from across Vassar's curriculum challenge students to enter sophisticated conversations by asserting compelling claims and supporting those claims through an organized presentation of evidence. Each First-Year Writing Seminar is built around a rich topic, giving students a complex set of readings, questions, and debates to consider as they learn to engage with the ideas of others and articulate their positions.

You will note that most of the First-Year Writing Seminars are offered in the fall semester. The online pre-registration form will ask you to list four choices for a fall First-Year Writing Seminar. However, due to enrollment limits, not everyone will be placed in a fall First-Year Writing Seminar during summer pre-registration. There are additional opportunities to enroll in a fall First-Year Writing Seminar during orientation, as well as during the add period at the beginning of term. Students not taking a First-Year Writing Seminar in the fall will be given priority in selecting a First-Year Writing Seminar for the spring semester. While you may elect more than one First-Year Writing Seminar in your first year, you may not enroll in more than one First-Year Writing Seminar per semester. AP credit will not exempt you from the requirement. For department policies on AP, see the *Departments of Instruction* section in this handbook.

Specific information about the English 101 sections:

- No first-year student should enroll in more than one English course in a single semester.
- English 101 may not be taken more than once.

- Students planning either to major in English or to pursue intermediate work in English are strongly encouraged to take 101 and 170 in sequence.

Fall Sections

Africana Studies 101a Martin Luther King Jr.

(Same as History 101)

This course examines the life and work of Martin Luther King, Jr. We immediately rethink the image of King who liberals and conservatives construct as a dreamer of better race relations. We engage the complexities of an individual who articulated a moral compass of the nation to explore racial justice in post-World War II America. This course gives special attention to King's post-1965 radicalism when he called for a reordering of American society, an end to the war in Vietnam, and supported sanitation workers striking for better wages and working conditions. Topics include

King's notion of the "beloved community," the Social Gospel, liberalism, "socially conscious democracy," militancy, the politics of martyrdom, poverty and racial justice, and compensatory treatment. Primary sources form the core of our readings.

AFRS 101.01 TR 9:00-10:15 am Quincy Mills

Africana Studies 109a Beyond the Veil and Islamic Terrorism: Modern Arabic Literature

This course introduces students to major themes, authors, and genres in modern Arabic literature from the late 19th century to the present. Readings include autobiography, fiction, drama, and poetry representing the rich Arabic literary heritage of the Middle East and North Africa. We also read various secondary materials and watch several documentary and feature films that will anchor our discussion of the literary texts in their socio-historical and cultural context(s). Some of the major themes (foci) of the course include (1) tradition and change, (2) the colonial and postcolonial encounters with the other, (3) changing gender roles and the politics of (Islamic) feminism, and (4) religion and politics, among others.

AFRS 109.01 MW 12:00-1:15 pm Mootacem Mhiri

Africana Studies 189a Religion, Community Organizing, and Movements for Civil Rights

(Same as Religion 189)

In American life religion is often portrayed as a divisive force. Yet historically, religious actors, communities, spaces, and motivations have contributed to broad-based collective movements for civil and human rights. This course explores the ways in which religions have supplied resources to help communities organize and develop visions of collective life.

AFRS 189.01 TR 1:30-2:45 pm Jonathon Kahn

Anthropology 170a Topics in Anthropology: Anthropology of Water

Many anthropologists study water as a focus of political contention and environmental impetus to action. But cultural anthropology's special contribution to water studies may be its insights into how water is valued, socially and affectively, in culturally and historically different ways. Water is necessary for human life. But it is always, also, meaningful in a remarkable range of ways that do not necessarily begin with scarcity, nor end with any one universal goal, even health or profit. Focusing on the relation between drinking water and wider cultural systems, the course introduces three approaches to drinking water: (1) Semiotics of Bottled Water includes readings from the anthropology of food and beverage, consumer culture, and meaning-making in everyday life. (2) Water as Global Commodity considers water in the context of the anthropology of gifts and commodities. (3) Water Projects considers state, corporate, and activist discourses about water with attention to anthropological studies of social and environmental impacts. Water cases include Bali, US, post-Soviet Georgia, Fiji and Singapore. The course will include (group) projects on water in local cultural contexts.

ANTH 170.01 MW 9:00-10:15 am Martha Kaplan

Anthropology 170a Topics in Anthropology: Language Facts, Language Fictions

True or false: women talk too much and men refuse to listen; Italian is beautiful, while German is ugly; double negatives are illogical; television is ruining the English language; there are primitive languages that have no grammar; southerners speak more slowly than northerners; everybody has an accent except where I grew up; language is used primarily to communicate factual information about the world; Eskimos have 17 words for 'snow'; men interrupt more than women; girls imitate how their mothers talk, while boys imitate how their fathers talk; everyone in Boston says, 'cah' instead of 'car'; if you grow up speaking two languages, you'll never speak either one perfectly. These statements represent the kinds of judgments we all tend to make about languages and everyday speech. Even as the course provides a solid grounding in linguistic analysis, it explores and explodes such judgments by asking students to assess critically their own ideas and ideologies about language.

ANTH 170.02 TR 10:30-11:45 am Thomas Porcello

Asian Studies 181a Imagining China

(Same as Religion 181)

In this seminar we examine from a broad comparative perspective some of the many ways China has been imagined - cosmologically, imperially, monastically, textually, mythologically, architecturally, constitutionally - taking into account voices from within and without China, past and present. As we shift from some of the earliest imaginings from within ancient China toward more modern imaginings, colonial representations of China become a priority as we move into modernity and the formation of the Chinese nation-state. One of our class objectives is to better understand what impact acts of imagination had and continue to have on Chinese society.

ASIA 181.01 MW 9:00-10:15 am Michael Walsh

College Course 182a Lost in Translation?

(Same as German Studies 182)

Eva Hoffman, who emigrated from Poland to Canada at age thirteen, initially experienced the transition from Polish to English as "a dispossession of one's self." For her, adapting to a new language and culture requires a balancing act: "how does one bend toward another culture without falling over, how does one strike an elastic balance between rigidity and self-effacement?" This course seeks to study what it means (and has meant) for a variety of non-native speakers to write in English: from the politics of using "the language of the colonizers," to personal journeys of self-transformation and loss of identity, to the discovery new aspects of one's personality in another linguistic and cultural context. Readings include stories, essays, speeches and autobiographies in which authors reflect on what it means to write in English. The course also explores aspects of second language acquisition, including the privilege of the non-native speaker, as well as academic essays on the relationship between language and personal identity. In addition to studying the stylistic conventions of academic writing in English, assignments give students the opportunity to reflect on their own

experiences as English learners and/or their experience working with communities of English speakers. The course is intended for students who are learning English as a second language. This course combines perspectives from literary writing (autobiography, biography, and other forms of life writing) with research from the field of applied linguistics that explores the relationship between language and identity. We will use the research of applied linguistics to analyze the perspectives and experiences presented in the life writing we read.

CLCS 182.01 MW 1:30-2:45 pm Karin Maxey

Cognitive Science 110a The Science and Fiction/Mind

Our understanding of what minds are and of how they work has exploded dramatically in the last half century. As in other areas of science, the more we know the harder it becomes to convey the richness and complexity of that knowledge to non-specialists. This freshman course will explore two different styles of writing for explaining new findings about the nature of mind to a general audience. The most direct of these styles is journalistic and explanatory and is well represented by the work of people like Steven Pinker, Bruce Bower, Stephen J. Gould, and Ray Kurzweil. The second style is fictional. At its best, science fiction not only entertains, it also stretches the reader's mind to a view of implications and possibilities beyond what is currently known. Isaac Asimov, Arthur C. Clarke, Greg Bear, and Richard Powers all provide excellent models of this kind of writing. In this course students practice both ways of writing about technical and scientific discoveries. By working simultaneously in both styles, it should become clear that when done well even a strictly explanatory piece of science writing tells a story. By the same token even a purely fictional narrative can explain and elucidate how the real world works. The focus of our work is material from the sciences of mind, but topics from other scientific areas may also be explored. This course does not serve as a prerequisite for upper-level courses in Cognitive Science.

COGS 110.01 TR 7:00pm-9:00 pm Kenneth Livingston

Education 162a Educational Opportunity in the U.S.

In this course, students identify, explore, and question prevailing assumptions about education in the United States. The objectives of the course are for students to develop both a deeper understanding of the system's historical, structural, and philosophical features and to look at schools with a critical eye. We examine issues of power and control at various levels of the education system. Participants are encouraged to connect class readings and discussions to personal schooling experiences to gain new insights into their own educational foundations. Among the questions that are highlighted are: How should schools be organized and operated? What information and values should be emphasized? Whose interests do schools serve? The course is open to both students interested in becoming certified to teach and those who are not yet certain about their future plans but are interested in educational issues.

EDUC 162.01 WF 10:30-11:45 am Jaime Del Razo

English 101a Literature and Evil

"Literature is not innocent," says Georges Bataille. Authentic aesthetic experience knows something of evil. It does not edify or console; it quickens and unsettles. We will study literary, philosophical, and cinematic texts that explore the various faces of evil – from the romantic to the banal, the irrational to the utterly unmotivated. Readings include: *The White Devil*, *Othello*, *Wuthering Heights*, *Heart of Darkness*, *Blood Meridian*, *The Dark Knight Returns*, as well as some Baudelaire, Nietzsche, Kafka, Bataille, and Arendt.

ENGL 101.01 WF 12:00-1:15 pm Heesok Chang

English 101a What is a Classic?

Why are some works of literature called classics? Which works are these? Do they have common traits? How is it that they have endured while other works have been largely forgotten? Are all classics related in some way to the original classics of Greek and Latin literature? How old does a work have to be to achieve the stature of a classic? Can there be modern or even contemporary classics? Through reading and discussion of poetry and prose works often thought of as classics, this class will investigate these and other questions. Authors will include some of the following: Homer, Virgil, Shakespeare, Ben Jonson, Jonathan Swift, Samuel Johnson, Jane Austen, Charlotte Bronte, Charles Dickens, Herman Melville, Walt Whitman, D. H. Lawrence, T.S. Eliot, Robert Frost, Nabokov, Flannery O'Connor, Joseph Heller, James Baldwin, Seamus Heaney, Elizabeth Bishop, Toni Morrison, Zadie Smith.

ENGL 101.02 TR 10:30-11:45 pm Robert DeMaria

English 101a Troubling Girlhood

From early-American witch trials to contemporary stories detailing the "dangers" of high school life or illuminating the power of teenage romantic love when it becomes entangled with political activism, this course explores narratives focused on the public and private lives of young women. The aim of the course is to write through and "trouble" (challenge and struggle over) our cultural assumptions regarding those who are gendered "girls" in the US. Using literary fiction, YA novels, short stories, memoir, and visual texts, we'll consider how various identity categories challenge and shift the meaning of "girlhood" in the United States. Students enrolled in this course will develop an academic writing practice, and learn to participate in and lead a college classroom discussion.

ENGL 101.03 TR 3:10-4:25 pm Eve Dunbar

English 101a Sounds American: Pop Music, Identity & Imagination

This is a course about the pop musical imagination, or what new possibilities, a catchy song, a groundbreaking album, or a brilliant artist compels us to envision. We'll approach this question thematically (rather than historically) and engage a range of texts—songs and albums; fiction and poetry; essays and memoirs; cultural histories and academic monographs; music videos and cultural theory—that bring the vast terrain that is the American soundscape into focus. Our considerations will draw from the perspective of the

listener, the fan, the critic, from the Jazz Age to the present. In other words, we will try and interrogate what it means to engage with music in the present day. How have portable devices or streaming services altered our relationship to music? How does pop music provide a surface upon which we debate questions of political identity, authenticity, and self-determination? What visions of independence or freedom emerge when we engage with pop culture seriously, and with scrutiny? Possible readings include Hari Kunzru's *White Tears*, Rebecca Dubrow's history of portable stereos, Patti Smith's punk memoir of seventies New York.

ENGL 101.04 MW 12:00-1:15 pm Hua Hsu

English 101a W(h)ither The Body

Current technologies only put into stark contrast almost a century in which the body has become a site of contestation: commercial, political, sexual, medial, artistic, and philosophical. Various literatures, some of them electronic (e.g., digital literature, virtual & augmented reality, computer games) have engaged (some say joined with) nanotechnology, genetic engineering, etc. to contest for the body, with some thinkers making radical claims that the body will disappear or merge with technology, or that it has already done so. Posthumanist, feminist, ludologist, media, and cyber theorists have all contributed to this polylogue. Thus "readings" will encompass varied media and may include Tom Tykwer's film "3" (Drei) and the original *Bioshock* game, as well as novels and poems such as Bennett Sims, *A Questionable Shape*, Nicole Brossard's *Picture Theory*, and Steven Hall's *The Raw Shark Texts*.

ENGL 101.05 MR 3:10-4:25 pm Michael Joyce

English 101a The Essay Form

The high-school essay trapped in the Darth Vader facemask called the topic sentence. And the immobile drapery of the five-paragraph costume armor. This is an exaggeration, of course, but to write in more imaginative ways let us examine the experiments in prose undertaken by essayists of the past hundred years or so: George Orwell writing about shooting an elephant, James Baldwin on his father's death and race riots, Jorge Luis Borges on his "modest blindness," Susan Sontag looking at photographs, Joan Didion bidding goodbye to New York, Adrienne Rich recalling the strands that make up her identity. Also, Geoff Dyer on sex and hotels, Lydia Davis on "Foucault and pencil," David Shields on the lyric essay, Jenny Boully on the body, Eliot Weinberger on what he heard about Iraq, and David Foster Wallace on anything. We will write brief essays (one to two pages) for each class and two longer essays (about eight pages in length).

ENGL 101.06 TR 10:30-11:45 am Amitava Kumar

English 101a Allegories of the Self

This seminar offers students intensive practice in close reading and interpretive writing and conversation through the examination of symbolic worlds inscribed in various media, including original works in Vassar collections, with a focus on the development of allegorical narrative in classical and Medieval textual sources and Medieval and Renaissance art. Our consideration of allegories as knowledge systems will

introduce students to the formulation of liberal arts education in the medieval schools, as well as to the culture of libraries and the organization of knowledge. Each member of the class will be asked to present an allegorical reading of a modern work selecting from narratives of literary authors such as Kafka and Orwell to works of painting and sculpture by artists such as Thomas Cole, Frida Kahlo and Kara Walker, to fantasy and science fiction film, television series, and game environments. The course will thus serve to familiarize you with conventions of meaning in creative works in various media expressly composed to be interpreted, introduce you to the foundations, culture, and tools of higher education, and also function as a practicum for improving your skills with written and spoken language.

ENGL 101.07 MR 3:10-4:30 pm Thomas Hill

English 101a What's Love Got to do With it?

This course focuses on representations of love (filial, parental, sexual, etc.) from antiquity to the present. Situating the selected works in their contemporary cultural and historical contexts, the course explores significant differences as well as possible continuities between past and present interpretations and representations of such basic concepts and institutions as gender, family, marriage, filial and marital duties, the private sphere, and sexuality. Shakespeare's *Romeo and Juliet* serves as a chronological center for these investigations, but we will also discuss passages from the Bible and selected texts (representing diverse dramatic, epic, and lyric genres) by Euripides, Aristophanes, Ovid, Petrarch, Boccaccio, Chaucer, Shakespeare, Shelley, Emily Brontë, and others. In addition, we will look at various adaptations (musical, theatrical, fine arts) of *Romeo and Juliet* as well as film versions.

ENGL 101.08 TR 3:10-4:25 pm Zoltan Markus

English 101a The Instruction of Citizenship

Emma Lazarus's celebrated poem, "The New Colossus," identifies the Statue of Liberty as the "Mother of Exiles" welcoming the world's "wretched" and "tempest-tost." However, the popular definition of the United States as a "nation of immigrants" repeatedly comes into crisis when the state faces the arrival of new groups. This course examines how literature by first- and second-generation Americans brings to light conditions that either bind or divide us as communities. Beginning with but not limited to scenes of classroom instruction (literal and metaphorical), we consider at what sites the instructing of citizenship takes place and what it mean to be "naturalized" as an American. We also interrogate citizenship as a model of political inclusion. Some guiding questions for us: What do we gain or lose with assimilation? How is "cultural citizenship" different from formal, legal citizenship? How does immigrant writing respond to or disrupt abstract notions of American citizenship? What is at stake in the language we use to describe displaced people(s): exiles, refugees, migrants, immigrants, asylees, etc...? What might popular culture teach us about citizenship?

ENGL 101.09 TR 12:00-1:15 pm Hiram Perez

English 101a The Ends of Black Autobiography

Autobiographical writing has been and remains a preeminent mode of African American expression. It was one of the first intellectual gestures that the formerly enslaved made when they gained literacy. It has fed music practices like the blues and hip-hop. It also may have created the circumstances by which the US could elect its first black president. Over the last three centuries, blacks have used this mode to insinuate themselves into literary modernity and register the often unacknowledged dynamism of their emotional and intellectual lives. This course will explore the aesthetics of black autobiographical narrative--its codes, tropes, and investments--from its beginnings in the eighteenth century to its most present iterations. If black autobiographical writing involves not only telling a story about a black subject, but also proffering a certain version of black life to its reading audiences, it is important to ascertain the nature of the cultural work that these stories (seek to) accomplish. Among the artists featured in this course are Frederick Douglass, Harriet Jacobs, W.E.B. Dubois, Zora Neale Hurston, Richard Wright, James Baldwin, Gloria Naylor, Barack Obama, Jasmyn Ward, Chris Rock, Oprah Winfrey, and MK Asante.

ENGL 101.10 MW 10:30-11:45 am Tyrone Simpson

English 101a Jane Eyres

Charlotte Brontë's *Jane Eyre* tells the story of a heated romance between a "poor, obscure, plain" governess and a Byronic landowner with a Gothic past. Published pseudonymously in 1847, the novel was a literary sensation as well as a bestseller, even though Brontë's rebellious heroine upended nineteenth-century notions of propriety and femininity. While popular in its day, *Jane Eyre* has also had a hypnotic hold on subsequent generations of writers, who have revised and re-imagined Brontë's text in order to contest its representations of love, madness, colonialism, Englishness, feminism, and education. In this first-year seminar, we will explore *Jane Eyre's* complicated relationship with its literary descendants and ask fundamental questions about literary influence, canon formation, narration, and women's writing. In addition to *Jane Eyre*, readings may include Elizabeth Braddon's *Lady Audley's Secret*, Charlotte Perkins Gilman's "The Yellow Wallpaper," Jean Rhys's *Wide Sargasso Sea*, and Tsitsi Dangarembga's *Nervous Conditions*. We will also screen different film adaptations of *Jane Eyre* in addition to Hitchcock's *Rebecca*.

ENGL 101.11 MWF 10:30-11:20 am Susan Zlotnick

English 101a Deception: Some Truths About Lies

Narratives told by someone who can't be trusted invite readers to explore the ambiguous border between truths and lies. An author's perceptions may differ from those of the first-person narrator—the "I"—who tells the story, and that discrepancy opens up intriguing psychological space. "Good readers read the lines, better readers read the spaces," the novelist John Barth has written. This section of English 101 will analyze both words and spaces—both what is said and what is unspoken or unspeakable. We'll investigate a rogues' gallery of unreliable narrators who bring varying degrees of

mendacity, self-aggrandizement, and self-deception to the stories they tell. Then, from both literary and neuroscience perspectives, we'll think about memory, the mind, and the brain. We'll ask: Are memories always fallible? Are they ever-evolving stories we tell ourselves? Is remembering an act of creation rather than straightforward retrieval of the past? Are we all unreliable narrators? Authors may include Alison Bechdel, James Baldwin, Jorge Luis Borges, Julio Cortázar, Lydia Davis, Fyodor Dostoyevsky, Ralph Ellison, Kazuo Ishiguro, Jamaica Kincaid, Tim O'Brien, Michael Ondaatje, George Orwell, Oliver Sacks, George Saunders, Charles Simic, Zadie Smith, and Oscar Wilde. Students will write both analytical and imaginative responses to the texts.

ENGL 101.12 WF 1:30-2:45 pm M Mark

English 101a Beneath the Apocalyptic Landscape

This course will explore characters caught in the dreamscape of violence and apocalyptic visions that is perhaps unique to American history and culture, from slavery to opiate addiction to school shootings. We'll examine the concept--coined by rock critic Greil Marcus--of Old Weird America, a folkloric history that has spawned murder ballads, the music of Bob Dylan and Johnny Cash, and a wide range of literary work, including poetry by Walt Whitman, William Carlos Williams, and Etheridge Knight; stories by Edgar Allan Poe, Joyce Carol Oates, Herman Melville, Flannery O'Connor, and Denis Johnson. Longer works may include novels by William Faulkner, Gayle Jones, William Vollmann, Hunter Thompson, and the graphic artist, Lynda Barry.

ENGL 101.13 TR 12:00-1:15 pm David Means

English 101a The Fiction of Faith

Some of the more controversial novels of the past century have depicted striking attitudes of religious belief. A faith in God (or the crucial lack of it) can trouble a novel's protagonist, drive the plot, and reveal the broader cultural norms of its readership. This course will investigate the ways in which works of fiction are uniquely capable of exploring questions of faith—and how, in turn, religious standpoints can be encountered, and sometimes publicly challenged, by particular fictional treatments. Selected texts and their respective spiritual frameworks will include: *Three Daughters of Eve* by Elif Safak (Islam), *The Ministry of Utmost Happiness* by Aranduhati Roy (Hinduism), *Brighton Rock* by Graham Greene (Catholicism), *Gilead* by Marilynne Robinson (Protestantism), *Only Yesterday* by S.Y. Agnon (Judaism), *The Temple of the Wild Geese* by Tsutomu Mizukami (Buddhism), *Native Son* by Richard Wright (Existentialism), and *Quarantine* by Jim Crace (Atheism).

ENGL 101.14 TR 10:30-11:45 am Robert Smith

Film 180a Detective Film

To prepare students for college-level writing, this course uses the detective film as the framework for learning how to write about motion pictures and for the development of critical reading, research, and writing skills. The figure of the detective is one of the most iconic archetypes in American cinema from the silent era to the present. We examine the detective film through the lenses of genre,

adaptation, sound studies, gender politics, and authorship. We also explore how the genre had adapted and responded to its socio-cultural or ideological contexts in movies such as *The Big Sleep*, *Blade Runner*, and *The Silence of the Lambs*. Throughout the semester, students write and revise a series of short papers, culminating with a final research paper. In these assignments, students consider such issues as the relationship between characters and their environment, why certain detectives (i.e., Sherlock Holmes and Philip Marlowe) have maintained their appeal over different historical periods, and how popular film genres can challenge or reinforce cultural norms and attitudes.

FILM 180.01 TR 10:30-11:45 am Alexander Kupfer

French and Francophone Studies 170-01 Perspectives in French and Francophone Cultures: Meeting Places

(Same as *Women's Studies 170*)

Beginning with the 19th century, this first-year writing seminar examines the role of gender in stories about people who meet in public urban places, such as bars, streets or cafés. Public urban places are associated with a specifically modern consciousness, characterized by the embracing of more fluid identities, fewer constraints, and a greater sense of the ephemeral. We use each text to practice writing about literature while exploring the critical concepts of gender, place and modernity in a French studies context. The course is taught in English: all works are read in translation.

FFS 170.01 TR 1:30pm-2:45 pm Kathleen Hart

German Studies 182a Lost in Translation?

(Same as *College Course 182*)

Eva Hoffman, who emigrated from Poland to Canada at age thirteen, initially experienced the transition from Polish to English as "a dispossession of one's self." For her, adapting to a new language and culture requires a balancing act: "how does one bend toward another culture without falling over, how does one strike an elastic balance between rigidity and self-effacement?" This course seeks to study what it means (and has meant) for a variety of non-native speakers to write in English: from the politics of using "the language of the colonizers," to personal journeys of self-transformation and loss of identity, to the discovery new aspects of one's personality in another linguistic and cultural context. Readings include stories, essays, speeches and autobiographies in which authors reflect on what it means to write in English. The course also explores aspects of second language acquisition, including the privilege of the non-native speaker, as well as academic essays on the relationship between language and personal identity. In addition to studying the stylistic conventions of academic writing in English, assignments give students the opportunity to reflect on their own experiences as English learners and/or their experience working with communities of English speakers. The course is intended for students who are learning English as a second language. This course combines perspectives from literary writing (autobiography, biography, and other forms of life

writing) with research from the field of applied linguistics that explores the relationship between language and identity. We will use the research of applied linguistics to analyze the perspectives and experiences presented in the life writing we read.

GERM 182.01 MW 1:30-2:45 pm Karin Maxey

Greek and Roman Studies 102a Cleopatra

A famous historian once wrote, "The true history of Antony and Cleopatra will probably never be known; it is buried too deep beneath the version of the victors." This course examines the life and times of Egypt's most famous queen, who was both a Hellenistic monarch, last of a dynasty founded by a companion of Alexander the Great, and a goddess incarnate, Pharaoh of one of the world's oldest societies. However, the ways in which Cleopatra has been depicted over the centuries since her death are equally intriguing, and the course considers versions of Cleopatra from the Romans to Chaucer, Boccaccio, Shakespeare, Gauthier, Shaw, and film and television to explore how different authors and societies have created their own image of this bewitching figure.

GRST 102.01 MW 1:30-2:45 pm J. Bert Lott

History 101a Martin Luther King Jr.

(Same as *Africana Studies 101*)

This course examines the life and work of Martin Luther King, Jr. We immediately rethink the image of King who liberals and conservatives construct as a dreamer of better race relations. We engage the complexities of an individual who articulated a moral compass of the nation to explore racial justice in post-World War II America. This course gives special attention to King's post-1965 radicalism when he called for a reordering of American society, an end to the war in Vietnam, and supported sanitation workers striking for better wages and working conditions. Topics include King's notion of the "beloved community," the Social Gospel, liberalism, "socially conscious democracy," militancy, the politics of martyrdom, poverty and racial justice, and compensatory treatment. Primary sources form the core of our readings.

HIST 101.01 TR 9:00-10:15 am Quincy Mills

History 160a Rediscovering U.S. History

This is not your parents'—or your high school teacher's—American history course. No textbook: instead we read memoirs, novels, newspaper articles, letters, speeches, photographs, and films composed by a colorful, diverse cast of characters—famous and forgotten, slaves and masters, workers and bosses. No survey: instead we pause to look at several illuminating "moments" from the colonial era through the Civil War to civil rights and the Cold War. Traveling from the Great Awakening to the "awakening" that was the 1960s, from an anti-colonial rebellion that Americans won (1776) to another that they lost (Vietnam), the course challenges assumptions about America's past—and perhaps also a few about America's present and future.

HIST 160.01 TR 9:00-10:15 am James Merrell

(Note: HIST 160.02 is not a First-year Writing Seminar.)

History 174a The Emergence of the Modern Middle East

This course is an exploration of the Middle East over the past three centuries. Beginning with economic and social transformations in the 18th century, we follow the transformation of various Ottoman provinces such as Egypt, Syria/Lebanon, and Algeria into modern states, paying careful attention to how European colonialism shaped their development. We then look at independence movements and the post-colonial societies that have emerged since the middle of the 20th century, concluding with study of colonialism's lingering power—and the movements that confront it.

HIST 174.01 TR 12:00-1:15 pm Joshua Schreier

Italian 175a The Italian Renaissance in English Translation

In this course we examine the notion of selfhood as it first appears in the writings of early humanists (XIV century), Renaissance authors (XVI century) and works of contemporary visual artists. Cultural, philosophical, aesthetic, and gender issues are investigated through the reading of literary and theatrical masterpieces and their influence on visual artists like Botticelli, Raphael, and others. We read in English translation excerpts from Petrarch (*Canzoniere and Letters*), Boccaccio (*Decameron*), poems and letters by women humanists (Isotta Nogarola, Cassandra Fedele, Laura Cereta), Machiavelli (*The Prince*), Castiglione (*The Book of the Courtier*), Gaspara Stampa and Veronica Franco (*Poems*). In order to foster the student's self-awareness and creativity, journaling, experiential practices, and a creative project, based on the course content, are included.

ITAL 175.01 WF 1:30-2:45 pm Eugenio Giusti

Jewish Studies 180a Interrogating Religious Extremism

(Same as Religion 180)

Where is the center in religion? And what defines the fringes, borders, margins and extremes? The aim of this course is to investigate the concept and category of religious "extremism" and how it relates to the equally fraught idea of "mainstream religiosity": to what extent does it draw on it and yet differ from it? What is the difference between "extreme" and "marginal"? After investigating these categories, we identify beliefs and social practices of contemporary Jewish, Christian and Muslim groups that depart from what we have identified as "mainstream" bodies of tradition in significant ways and seek to understand the complex theological and social agenda behind them. We also investigate how these groups portray themselves and construct their identity *vis-à-vis* the more centered groups by simultaneously laying claim on tradition and radically deviating from it.

JWST 180.01 MW 12:00-1:15 pm Agnes Veto

Latin American and Latino/a Studies 106a Dynamic Women: From Bachelet to Ugly Betty

How do issues of inequality, social justice, representation, popular culture, migration, environmental justice and globalization look when women's voices and gender analysis are at the center? This multidisciplinary course examines writing by and about women in Latin America, the Caribbean, and Latino/a USA. We read and write about a range of

genres, from testimonio, film, and fiction to social science. The goal is to develop an appreciation and understanding of the varied lives and struggles of Latinas and Caribbean women, the transnational politics of gender, key moments in the history of the hemisphere, and contemporary issues across the Americas.

LALS 106.01 TR 12:00-1:15 pm Light Carruyo

Mathematics 131a Numbers, Shape, Chance, and Change

What is the stuff of mathematics? What do mathematicians do? Fundamental concepts from arithmetic, geometry, probability, and the calculus are explored, emphasizing the relations among these diverse areas, their internal logic, their beauty, and how they come together to form a unified discipline. As a counterpoint, we also discuss the "unreasonable effectiveness" of mathematics in describing a stunning range of phenomena from the natural and social worlds. The fall 2018 section of MATH 131 will have a special focus on the *mathematics of democracy*. Through a systematic study of democratic procedures—such as voting rules, opinion polls, and methods of apportionment—we will engage mathematics both as a useful tool and as a beautiful subject in its own right. Like most good mathematics, the questions we consider are easy to state, but may be difficult to answer: What does it mean to allocate representation in government *proportionally*? Is it possible to quantify an individual's political power? Are there any voting systems that are truly fair? Although little mathematical background is required, the tools we develop will be powerful and allow us access to deep ideas.

MATH 131.01 MW 1:30-2:45 pm Jan Cameron

Media Studies 184a Star Wars: Resistance, Rebellion, and Death in a Galaxy Far, Far Away

In a 19 September 1944 article for the French resistance newspaper, *Combat*, Albert Camus wrote, "Revolution is not revolt. What carried the Resistance for four years was revolt—the complete, obstinate, and at first nearly blind refusal to accept an order that would bring men to their knees. Revolt begins first in the human heart. But there comes a time when revolt spreads from heart to spirit, when a feeling become an idea, when impulse leads to concerted action. This is the moment of revolution." Our course examines the multimodal rhetorics of conquest and empire, freedom and rebellion in the *Star Wars* canon by situating the films in a theoretical context provided by Frantz Fanon (*The Wretched of the Earth*), Hannah Arendt (*Between Past and Future*) and Albert Camus (*The Rebel*). Within this post-colonial context, students are afforded the opportunity to design and conduct their own research-based projects that consider representations of the intersections between imperialism, revolution, and identity politics.

MEDS 184.01 TR 10:30-11:45 am Matthew Schultz

Music 180a The Art of Writing About Music

How is it possible to write about music in ways that are both well-informed and accessible by a majority of readers? In this course, we listen to a wide variety of music, with the

purpose of learning how to write clearly and persuasively about music. To this end we develop a vocabulary for music that is broadly non-technical, yet characterized by a clear understanding of the basic elements that give life to all kinds of music. Our reading list ranges widely, and includes both journalism and musicological writing. Over the course of the semester we examine more and more complex kinds of music, beginning with songs of all kinds, and ending with works of greater scope (operas, symphonies, concertos, and more). The goal is both to challenge ourselves as writers, and to find ways to write about the almost maddening varieties of music that confront us in modern life.

MUSI 180.01 TR 3:10-4:25 pm Brian Mann

Psychological Science 108a Living Rhythms

Human activity is rhythmic. We engage in cycles of eating, loving, working, resting, walking, talking, learning, and sleeping. We multitask, nesting and switching cycles within cycles. Our activity entrains to cycles of the sun, moon, weather, natural and cultural seasons, and human-made devices. In this course, students explore and write about the psychology of rhythmic activity by means of participation, observation, interview, and literature review.

Religion 181a Imagining China

(Same as Asian Studies 181)

In this seminar we examine from a broad comparative perspective some of the many ways China has been imagined—cosmologically, imperially, monastically, textually, mythologically, architecturally, constitutionally—taking into account voices from within and without China, past and present. As we shift from some of the earliest imaginings from within ancient China toward more modern imaginings, colonial representations of China become a priority as we move into modernity and the formation of the Chinese nation-state. One of our class objectives is to better understand what impact acts of imagination had and continue to have on Chinese society.

RELI 181.01 MW 9:00-10:15 am Michael Walsh

Religion 189a Religion, Community Organizing, and Movements for Civil Rights

(Same as Africana Studies 189)

In American life religion is often portrayed as a divisive force. Yet historically, religious actors, communities, spaces, and motivations have contributed to broad-based collective movements for civil and human rights. This course explores the ways in which religions have supplied resources that help communities organize and develop visions of collective life.

RELI 189.01 TR 1:30-2:45 pm Jonathon Kahn

Russian Studies 171a Russia and the Short Story

In this course we read and discuss a number of classic short stories by such Russian masters of the genre as Gogol, Turgenev, Chekhov, Babel, and Olesha.

RUSS 171.01 TR 12:00-1:15 pm Charles Arndt

Women's Studies 160a Bodies and Texts

This course is an introduction to issues in feminism with a focus on the female body and its representations. We read and write about a variety of texts, consider historical objects as well literary documents, and analyze visual materials from art, fashion, advertising, and film from the nineteenth century to the present. Particular focus is given to women's bodies in visual, material, and literary culture. We make use of Vassar resources such as the Rare Book Collection, the Costume Shop and the Frances Lehman Loeb Art Center.

Spring Sections**Anthropology 170b Topics in Anthropology: Bones, Bodies, and Forensic Cases**

The accidental discovery of an isolated human bone or entire human body occurs more frequently than most people think. How these discoveries are dealt with is often a decision that involves local law enforcement, medical officials, archaeologists, and physical anthropologists. This course examines several such cases, following them from initial discovery to final conclusion. What clues do bones and bodies reveal? What evidence was found on or near these individuals? How do we piece together a narrative? Who decides

what happens next? Contrary to what we see on television and in the movies, these cases require patience and cultural awareness and do not always lead to a clear happy ending.

ANTH 170.51 MW 1:30pm-2:45 pm April Beisaw

Earth Science 111b Science and Justice in the Anthropocene

(Same as *Geography 111 and Science, Technology, and Society 111*) Geoscientists have proposed a new designation in the geologic time scale for our current time period, “the Anthropocene.” The designation reflects the fact that human beings are acting as geological agents, transforming the Earth on a global scale. In this first-year seminar course we explore the possibilities of reconfiguring the actions of humans in the Anthropocene so as to lead to justice in environmental arenas and ultimately to a flowering of a new Era once called ‘the Ecozoic’ by cultural historian Thomas Berry.

ESCI 111.51 TR 12:00-1:15 pm Jill Schneiderman

Education 162b Educational Opportunity in the U.S.

In this course, students identify, explore, and question prevailing assumptions about education in the United States. The objectives of the course are for students to develop both a deeper understanding of the system’s historical, structural, and philosophical features and to look at schools with a critical eye. We examine issues of power and control at various levels of the education system. Participants are encouraged to connect class readings and discussions to personal schooling experiences to gain new insights into their own educational foundations. Among the questions that are highlighted are: How should schools be organized and operated? What information and values should be emphasized? Whose interests do schools serve? The course is open to both students interested in becoming certified to teach and those who are not yet certain about their future plans but are interested in educational issues.

EDUC 162.51 TR 10:30-11:45 am Maria Hantzopoulos

English 101b Queer Alphabets

A primer in gay and lesbian literature, both classic and contemporary. We will examine a range of texts, including recent coming out stories, nineteenth-century encoded texts, a silent movie from 1919 Germany, the sonnets of Shakespeare and the love poems of Adrienne Rich. Other authors may include James Baldwin, Willa Cather, Henry James, Alison Bechdel and Carol Anshaw.

DEPARTMENTS OF INSTRUCTION AND MULTIDISCIPLINARY PROGRAMS

Africana Studies

Founded in 1969 out of student protest and political upheaval, the Africana Studies Program continues its commitment to social change and rigorous intellectual engagement. The Africana Studies Program draws on a range of theoretical and methodological approaches to explore the cultures, histories, institutions, and societies of African and African-descended people. The Program offers a major and correlate sequence (minor) in Africana Studies, and correlates in Arabic language and culture, and prison studies.

Students interested in Africa and its Black diasporas within Africa, in the Americas, and the Caribbean should enroll in Introduction to Africana Studies (AFRS 100) in the spring. This is a great course for any student interested in exploring questions of power and liberation, and is required for all Africana majors and correlates. This course examines such topics as colonialism, slavery, nationalism and transnationalism, civil and human rights, race, gender and sexuality in Africa, the Caribbean and Latin America, and the United States. First-year students will be particularly interested in three First-Year Writing Seminars offered in the fall: Martin Luther King, Jr. (AFRS 101), Modern Arabic Literature (AFRS 109), and Religion, Community Organizing, and Movements for Civil Rights (AFRS 189). For students interested in learning Arabic, we encourage you to take Elementary Arabic (AFRS 106) in the fall and Elementary Arabic (AFRS 107) in the spring. Some faculty will allow first-year students to enroll in 200 level (intermediate) courses in the spring, but students should speak with the professor for information on the workload and to gain permission to enroll.

For more information on major and correlate requirements, please visit <http://africanastudies.vassar.edu> or email africanastudies@vassar.edu.

American Studies

The American Studies Program began in 1973 as “The Program in the Changing American Culture” and was one of the earliest multidisciplinary programs to be established at Vassar. Courses draw on the broad resources of the college to explore the cultural, historical, and political processes that comprise the United States, as these take shape both within and beyond the nation’s geographical borders. An individually designed course of study, which is the hallmark of the program, allows students to forge multidisciplinary approaches to the particular issues that interest them. For example, students have come to the American Studies Program in order to combine interests in club music and U.S. urban policy; to explore literary and geographic

representations of American utopian communities; and to integrate studio art with education certification. The program also offers a correlate sequence in Native American Studies that enables students to examine Indigenous cultures, politics, histories, and literatures in a primarily North American context.

Of particular interest to first-year students are the 100-level courses, Introduction to American Studies (American Studies 100), and Introduction to Native American Studies (American Studies 105).

Beyond the introductory level, the program offers courses on the rise of U.S. consumer culture, on Native American urban experience, on the WPA photography and literature of the 1930s, on the civil rights movement, on the art and thought of the 1980s, and on emerging forms of journalism. Students exploring the major are encouraged to take the required seminar, America in the World (American Studies 250) during their sophomore year. Students with questions about the program or its courses should feel free to email the program director, Hua Hsu, at huhu@vassar.edu, or the program’s administrative assistant, Darcy Gordineer, at dagordineer@vassar.edu.

For more information, please visit <http://americanstudies.vassar.edu>.

Anthropology

Anthropology is the study of humanity, in all its complexity, throughout the world. It offers detailed accounts of human origins, evolution, history, politics, expressive communication and performance (such as art, music, and ritual practices) and sociocultural diversity. Anthropologists engage in ethnographic, archival, biological, archaeological, and linguistic research that focuses on both individual and collective experiences; they also participate in an open and critical exchange with the humanities and the social, physical, and biological sciences. A central concern of anthropologists is the application of knowledge to the solution of human problems. Historically, anthropologists in the United States have been trained in one of four subdisciplines: sociocultural anthropology, linguistic anthropology, biological/physical anthropology, and archaeology.

Anthropologists often integrate perspectives drawn from these subfields into their research, teaching, and professional lives. Courses available to first-year students include three First-Year Writing Seminars: Anthropology of Water (Anthropology 170-01 fall), Language Facts, Language Fictions (Anthropology 170-02 fall) and Bones, Bodies and Forensic Cases (Anthropology 170-51 spring) plus Cultural Anthropology (Anthropology 140), which is required of all majors, Archaeology (Anthropology 100), Human Origins (Anthropology 120), and Linguistics and Anthropology (Anthropology 150).

First-year students with a strong interest in anthropology or some background in the social sciences might also consider Anthropology 240-01 China Now, or Anthropology 240-02 The Pacific offered in the fall. Please email the instructors directly with any questions or for additional information.

Majors will also need to take a course in anthropological theory, obtain some field experience, and become familiar with at least two of the other subdisciplines and two cultural regions. Beyond this, students follow their own interests and inclinations with the assistance of departmental faculty.

For more information, please visit <http://anthropology.vassar.edu> or email thporcello@vassar.edu.

Art

Creativity has long been measured by the work of art and architecture. The subject is vast. The Introduction to the History of Art (Art 105 and Art 106) provides a two-semester introduction to this history of art and architecture. Opening with the global present, Art 105 uses today's digital universe as a contemporary point of reference to earlier forms of visual communication. Faculty presentations explore the original functions and creative expressions of art and architecture, shaped through varied materials, tools and technologies. Art 106 continues exploration of an accelerating global exchange of images and ideas from Michelangelo in the High Renaissance to contemporary architecture and video. Students see how the language of form changes over time and how it continually expresses cultural values and addresses individual existential questions. Each week students attend three lectures and a discussion section, which makes extensive use of the Vassar College collection in the Loeb Art Center. The course furnishes many points of entry into the entire spectrum of human accomplishment. Art history is, by its nature, transdisciplinary—drawing on pure history, literature, music, anthropology, religion, linguistics, science, psychology, and philosophy. Over the years Vassar students from every major have found it to be vital to them in ways that they could never have predicted.

Art 105 and Art 106 can be taken as stand-alone courses. Electing both semesters of Art 105 and Art 106 in chronological sequence is strongly recommended, but each may be taken individually or in the order that fits a student's schedule.

Studio classes in drawing, painting, sculpture, photography, printmaking, color, computer animation, and video are available to studio majors, correlates, and nonmajors. The yearlong introductory course, Drawing I (Art 102-103), is open to first-year students. This course, suited to students with a range of drawing experience from beginners to those with extensive drawing experience, is the pre- or corequisite for the intermediate studio courses. Color (Art 108) is also open to first-year students. Studio courses meet four hours per week for one unit of credit. As part of their instruction, all students receive individual criticism. Intermediate and advanced architectural drawing and design classes are also offered, with prerequisites that are listed in the catalogue. Note that there is a lab fee for all studio courses; see the catalogue for details. Students enrolled in studio courses who are receiving financial aid may apply to the Office of Financial Aid for a stipend to offset this fee.

For more information, please visit <http://art.vassar.edu>.

Asian Studies

The Program in Asian Studies introduces you to a multidisciplinary and global approach to studying the peoples and cultures of Asia, examining both traditional Asian societies and their transformations in recent times. The program offers a major and a correlate sequence (minor) in Asian studies and a correlate sequence in Asian American studies. Majors and correlates work closely with advisors to design their program of study. Majors typically choose two disciplines and focus on a particular Asian country or region while also learning about other Asian societies. The program has 19 faculty members who teach a broad range of courses. Of particular interest to first-year students are: Religions of Asia (Religion/Asian Studies 152); Encounters in Modern East Asia (History/Asian Studies 122); Introduction to Chinese and Japanese Literature (Chinese-Japanese 120); Early Chinese Philosophy (Philosophy 110); and Analyzing Politics in the World (Political Science 150, when taught by Asian Studies faculty member). Each of these courses can fulfill part of the introductory level requirement for the Asian studies major or junior year abroad in an Asian country should begin language study in their first year if possible. Vassar offers classroom instruction in Arabic, Chinese, and Japanese, with Hindi, Korean, and Turkish available through the Self-Instructional Language Program. The Asian studies correlate sequence encourages, but does not require, language study.

For more information, please visit <http://asianstudies.vassar.edu> or email Professor Fubing Su, director of Asian Studies, at fusu@vassar.edu.

Astronomy (see Physics and Astronomy)

Biochemistry (also see Biology and Chemistry)

Biochemistry is an interdepartmental program of the Biology and Chemistry Departments. The program provides a broad and deep foundation in biology and chemistry as a basis for studying the molecular aspects of biological phenomena. The program progresses through introductory studies in biology, chemistry, mathematics, and physics to advanced courses in biology and chemistry, integrative courses in biochemistry, and a capstone laboratory research experience in the senior year.

Students should feel free to contact the program director Dr. Eric Eberhardt (ereberhardt@vassar.edu) or any of the faculty members from the Biology and Chemistry Departments to ask questions about which courses to consider in their first year.

First semester, first-year students considering a biochemistry major are strongly advised to enroll in

- Introductory Biology 105 or 106 (for information about placing out of BIOL 105 with AP or IB credit, see the section on "Biology" below);
- General Chemistry 108 or Chemistry 125 (for information on whether you should take the full year

CHEM 108/109 course or should take the accelerated one semester CHEM 125 course, see the section on "Chemistry" below);

- Math 121, 126/127 or 220 (for information about which of these courses might be the appropriate entry point for you, see the section on "Mathematics" below).

For more information, please visit the Biochemistry Program's website (<http://biochemistry.vassar.edu>) or email the program director Eric Eberhardt (ereberhardt@vassar.edu).

Biology

Vassar's biology curriculum allows students to explore the breadth of the life sciences, to focus on a wide variety of subjects in depth, and to gain experience in research. A major in biology prepares students for graduate study in a variety of disciplines, and for a broad array of careers including biological and biomedical research, biotechnology, conservation and environmental work, law, education, journalism, medicine, and the related health professions. We also offer the possibility of pursuing a correlate sequence in biology, which includes our two introductory courses and four courses of more advanced work. The correlate sequence is described in more detail in the Vassar Course Catalogue.

First-year students may take biology for a number of reasons, to begin a major in biology or a related field, to broaden a liberal arts education, or to explore scientific, biomedical, or environmental interests. We offer two introductory courses: Biology 105 and Biology 106. Neither is a survey course, and neither is a repetition of high school AP biology. In Biology 105 students explore a specific topic, develop their understanding of the central concepts of biology, and enhance their critical thinking and communication skills. In Biology 106 students conduct laboratory or field investigations, develop their abilities to observe, formulate, and test hypotheses, design experiments, collect and interpret data, and communicate results. Detailed descriptions of the Biology 105 topics being offered this year can be found in the Vassar Course Catalog.

Students who receive exam scores of 4 or 5 on the AP Biology exam and report the score to Vassar College will receive one unit of 100-level biology credit toward graduation and may opt to place out of Biology 105. Students with International Baccalaureate (IB) Biology HL test scores of 5, 6, or 7 may also place out of Biology 105. Students must confirm their IB credit with the Dean of Studies Office.

Two units of 100-level work in biology (Biol 106 and either Biol 105 or a qualifying AP/IB Biology exam score) are required for election of 200-level biology courses. If you are contemplating a major in biology or a related field, it is strongly advised to take these 100-level courses in the first year. Please note that first-year students must take Biology 105 (or have a qualifying AP/IB Biology exam score) before taking Biology 106. Both are popular courses, so those wishing to take one in the fall should rank it high on their pre-registration list.

Students planning to major in biology or biochemistry are also advised to complete Chemistry 108/109 or 125 in the first year. Students considering medical careers should consult the section on "Preparation for Medical School" in this handbook.

For more information, please visit the Biology Department website (biology.vassar.edu), or contact the Biology Department chair, Kate Susman (845-437-7441, kasmusan@vassar.edu).

Chemistry

Chemistry is the study of the composition, structure, properties, and reactions of matter. A major in chemistry at Vassar provides preparation for graduate study in chemistry or related areas, such as medicine, environmental science, materials science, public health, and toxicology, and is also excellent training for future teachers, lawyers, and individuals working in business or an industrial setting.

There are three chemistry courses that can be taken during the first year, all of which combine lecture and laboratory work. The course a student elects will depend on his or her background in chemistry. Chemistry 108/109, General Chemistry, is open to all students regardless of their background in chemistry. This course covers the fundamental concepts of chemistry and begins to build an understanding of the physical world from the perspective of atomic theory. Chemistry 125, Chemical Principles, is designed to cover the important aspects of general chemistry in one semester and is appropriate for students who have previously studied chemistry. The material covered in Chemistry 125 includes chemical reactions, stoichiometry, atomic and molecular structure, and general chemical physics, emphasizing the fundamental aspects of and connections between equilibria, electrochemistry, thermodynamics, and kinetics. The Chemistry Department offers a written examination to incoming first-year students interested in advanced course placement into Organic Chemistry (Chemistry 244/245). This placement is only granted in exceptional circumstances. Please consult the department for further information.

An essential aspect of training in chemistry is the experience of independent laboratory work and research. The Chemistry Department, therefore, provides students the opportunity to use sophisticated instrumentation at all levels of the curriculum and encourages student participation in independent research as early as second semester of the first year. First-year students may work on a research project under the direction of a member of the department by electing Independent Research (Chemistry 198) after consultation with a faculty mentor. Students considering majoring in chemistry should elect chemistry and calculus during their first year and elect physics during either the first or sophomore year. Students who plan to graduate in less than four years or graduate with a degree certified by the American Chemical Society should consult with a department advisor early in their first semester.

For more information, please visit <http://chemistry.vassar.edu> or email chemistry@vassar.edu.

Chinese and Japanese

The Department of Chinese and Japanese is committed to helping students prepare as early as possible for their post-graduation endeavors ranging from graduate studies to careers in both public and private sectors that require Chinese or Japanese linguistic and/or literary and cultural proficiency. The department offers two majors: Chinese and Japanese. In addition, it offers a correlate sequence in Chinese, a correlate sequence in Japanese, and a correlate sequence in Chinese and Japanese Literary and Cultural Studies. The department provides five levels of language instruction in Chinese and four levels in Japanese as well as a wide range of literature and culture courses including poetry, fiction, drama/theater, film, popular culture, linguistics, and literary theory.

First-year students intending to study Chinese or Japanese with no previous training in Chinese or Japanese are advised to start in their first year and may elect the year-long Chinese 105-106 or Japanese 105-106, both of which fulfill the foreign language proficiency requirement of the college. First-year students with some but limited knowledge of Chinese may be placed in Chinese 107-108, the advanced elementary course. First-year students with even better knowledge of Chinese or Japanese may be placed directly in intermediate or higher courses based upon the results of the placement test. The placement tests are administered in the department during New Student Orientation. The department does not automatically honor the level of students' language proficiencies indicated in the courses or examinations they took in high school or other pre-matriculation programs. Students must take the placement test to be placed in an appropriate level of Chinese or Japanese.

Also available to first-year students are courses taught in English: Introduction to Chinese and Japanese Literature (Chinese-Japanese 120), or, with special permission from the instructor, Chinese or Japanese literature or culture courses at the 200 level. Students who are considering a major or double major in Chinese or Japanese are strongly urged to begin their language study in their first year, continuing with intermediate or advanced language courses in their sophomore and junior years. Students may accelerate the course of their language study by studying at approved summer language programs. Two years of language study are required for students who plan to study in China or Japan during the junior year, so starting the language study early is important. The department places students in strong junior year abroad study programs.

Among the department's on-campus activities are annual events such as Chinese and Japanese Culture Day, Chinese New Year Celebration, and the Japanese Cherry Blossom Festival, each of which enriches the students' language and cultural experiences. Students can also benefit from participation in the weekly Chinese or Japanese language table, during which conversations with native speakers and other Chinese or Japanese cultural activities are held. For more information, please visit <http://chineseand-japanese.vassar.edu>.

Classics or Classical Studies

(See Greek and Roman Studies)

Cognitive Science

We human beings take it for granted that we are possessed of minds. You know that you have a mind and you assume that other people do, too. But to what, exactly, are we referring when we talk about the mind? Is a mind just a brain? What endows your mind with the property of being conscious? How does your mind allow you to extract music from sound waves, relish the taste of chocolate, daydream, feel happy and sad, or reach for your cup when you want a sip of coffee? How similar is your mind to the minds of other people? Do you have to be a human being to have a mind? Could other entities have minds so long as they were built the right way? Does your computer have a mind? These are the kinds of questions that cognitive scientists want to address.

Introduction to Cognitive Science (Cognitive Science 100), which is required for the major but open to all students, is the entrance into the department. The course asks what we mean by mind and who or what has a mind. We examine computer models of mind and the relationship between mind and brain. The course also focuses on what enables any agent—from simple animal to human to smart machine—to act intelligently. We especially focus on perception and action, memory, decision making, language, and consciousness. We also explore the degree to which cognition requires and is influenced by having a body situated in a particular context. Multiple sections of the course are offered each year, and first-year students interested in cognitive science are encouraged to consider taking one. This course also serves as the prerequisite for all intermediate-level courses in cognitive science.

Cognitive science is a broadly multidisciplinary field that has emerged at the intersection of a number of older disciplines, such as philosophy, computer science, psychology, neuroscience, anthropology, linguistics, biology, and mathematics. The department offers a core set of courses that teach students how to think in an integrative fashion, but it also requires that students find applications of these ideas in other areas of the curriculum outside of cognitive science. Courses in many divisions of the curriculum, from the arts to the sciences, may count toward the major if they help to develop the skills needed to complete the required senior thesis. The interested student should consult the department web pages or meet with a member of the faculty to discuss how these courses might be selected.

Vassar offered the first undergraduate major in cognitive science in the world. Distinctive aspects of the program include the number of integrative courses offered in cognitive science itself, especially the intermediate level and laboratory course offerings, and the commitment to balanced coverage of the main topics and perspectives that characterize the current state of this rapidly changing field. Opportunities are available for students to obtain summer positions working on faculty research projects at Vassar and at other schools.

For more information about these and about the major, please consult the catalogue or visit <http://cogsci.vassar.edu>. You may also call the department office at (845) 437-7368.

College Course

The College Course Program was established to ensure that students can have direct exposure in their years at Vassar to some important expressions of the human spirit in a context that is both multidisciplinary and integrative. The aim of a College Course is to study important cultures, themes, or human activities in a manner that gives the student experience in interpreting evidence from the standpoint of different fields. The courses relate this material and these interpretations to other material and interpretations from other fields in order to unite the results of this study into a coherent overall framework. The interpretations are expected to be both appreciative and critical, and the artifacts will come from different times, places, and cultures.

First-year students are encouraged to check the catalogue for descriptions of offerings in the College Course Program.

Computer Science

Vassar's Computer Science Department offers students the opportunity to study the field of computer science in the context of a liberal arts education. The department's program, with its theoretical core, provides excellent preparation for graduate study in computer science as well as a career in the profession.

Computer Science 101, the entry-level course in computer science, introduces computing concepts through structural recursion and functional programming. A student who already has this background may be able to go directly into Computer Science 102 or 145 after consulting with the department. Prospective computer science majors are strongly advised to complete Computer Science 101, 102, and 145 within their first three semesters. After completing Computer Science 101, a student may take Computer Science 102 and Computer Science 145 in either order or simultaneously. Prospective majors should plan to complete *one of the following* by the end of sophomore year: Math 221, 241, 242, or 261. Note that these courses may have prerequisites in mathematics.

Students who want to include a foundation in computer science in their undergraduate programs of study are advised to take Computer Science 101 and 102 and/or 145. This foundation is strongly recommended for science majors who may also opt to take Computer Science 250, Modeling, Simulation, and Analysis.

For students who want to complement other majors with substantial work in computer science, the department offers several correlate sequences consisting of 6 or 7 computer science courses with various emphases. Vassar's Computer Science Department offers several courses in areas relevant to the broader liberal arts curriculum, including artificial intelligence, computational linguistics, graphics and animation, and bioinformatics. Cognitive science majors with an interest in artificial intelligence or language may choose one

of the tracks within their major that includes a sequence of relevant computer science courses.

The department houses computer laboratories containing workstations running the Linux operating system, available to majors and students taking courses in the department. Ongoing research projects in several areas of the field offer students the opportunity to work with faculty both during the academic year and over the summer.

For more information, please visit <http://computer-science.vassar.edu> or email csdept@vassar.edu.

Dance

Dance is an elective academic course of study with two full-time faculty, one visiting and two part-time faculty, a resident lighting designer/technical director, and three adjunct artists/accompanists. Located in Kenyon Hall, the Dance Department's facilities include four dance studios and the Frances Daly Fergusson Dance Theater, which seats 242. All the dance floors are designed specifically to serve the needs of the dance program.

Vassar's primary student dance performance group, Vassar Repertory Dance Theatre (VRDT), holds an annual audition during the first week of classes in the fall. VRDT performs throughout the year and may be taken for academic credit. It is a yearlong commitment. The repertoire includes existing works in the jazz, modern dance, and classical ballet styles as well as new creations by guest choreographers, faculty, and students.

The technique courses offered are beginner through advanced modern dance technique, beginner through four levels of intermediate classical ballet technique including pointe and adagio when suitable, beginner to intermediate jazz, and intermediate Graham technique and repertory. In addition to the technique courses, the department offers courses in choreography, improvisation, and movement analysis. These are open to all students. The choreography students and the independent study students often perform in December and April.

Details on all courses may be found in the catalogue. For placement or special permission signatures, consult the appropriate individual faculty member. For the VRDT audition date in the fall, performance dates for the year, master class offerings, and other information, call the Dance Office at 845-437-7470 or visit our website at <http://dance.vassar.edu>.

Drama

Drama majors study all aspects of theater. We strongly believe that theory and practice are inseparable. Complex learning, analytical and critical thinking, and collaborative, embodied practice as they are taught in the classroom are tested in a laboratory production environment. The Drama Department curriculum and its Experimental Theater work in tandem. Opportunities for first-year students include Drama 102 (Introduction to Theater-Making) and Drama 103 (Introduction to Stagecraft), and the possibility of auditioning and/or participating in Drama 200 (Production).

First-year students planning to continue the study

of drama beyond their first year should note that Drama 102 (Introduction to Theater-Making) and Drama 103 (Introduction to Stagecraft) are prerequisites for all 200-level work in drama. Productions undertaken by the department are curricular in nature.

The department undertakes faculty directed projects and a number of senior projects, both emphasizing the collaborative nature of theatrical production. Occasionally the department hires guest artists to create specific projects with our students. Our productions are presented in the Vogelstein Center for Drama and Film or in the Hallie Flanagan Powerhouse Theater.

For more information, please visit <http://drama.vassar.edu> or contact the Drama Department at drama@vassar.edu or (845) 437-5250.

Earth Science (Geology)

Catastrophic events such as hurricanes and tsunamis and the specter of global climate change underscore the importance of Earth science in a well-rounded liberal arts education. Earth scientists at Vassar study our planet as a system of interacting spheres—the atmosphere, hydrosphere, biosphere, and rock sphere—that create the environments in which we live, the natural hazards with which societies must contend, and the natural resources upon which we rely. We also work to understand the impacts of human activities on the surface of the planet and provide tools to help remedy environmental problems. Courses emphasize field experiences, both in the Hudson Valley and beyond, and many employ cutting-edge technology and computer software to enhance field and laboratory study. Majoring in Earth Science prepares students for a range of careers, including education, government research, environmental consulting, natural resource management, public health, journalism, sustainable development, and environmental law, among others.

We offer several courses of particular interest to first-year students. For students seeking an in-depth introduction to major concepts of Earth science, the department recommends Earth, Environment, and Humanity (Earth Science/Geography 151), which fulfills the college's quantitative analysis requirement and studies the internal and surface processes that shape the Earth as well as geologic hazards and human impacts on the environment. Other introductory courses include topics such as Field Geology of the Hudson Valley, Volcanoes and Civilization, and a First-Year Writing Seminar, Science and Environmental Justice in the Anthropocene.

Beyond the introductory level, intermediate and upper-level courses in Earth Science focus on Earth's 4.6-billion year history; surface processes that sculpt landforms; formation of minerals, rocks, sediments and soils; water resources; and Earth's history of climatic change.

Abundant opportunities exist for guided independent as well as collaborative research with faculty. Examples of current research with students include studies of microplastics in dune sands of Cape Cod, recent climate change using lake sediment cores from New York and New Mexico,

impacts of urbanization on water quality of streams and aquatic ecosystem health, atmospheric deposition of metals in high altitude Catskill Mountain bogs, and low-temperature metamorphism of rocks in geothermal wells.

Details regarding courses as well as requirements for majoring or electing a correlate sequence can be found in the catalogue. Interested students are also encouraged to email the chair of the Department of Earth Science and Geography, Jill Schneiderman, schneiderman@vassar.edu, and to visit <http://earthscienceandgeography.vassar.edu>.

Earth Science and Society

The Earth Science and Society major combines departmental courses from Earth Science and Geography to provide a focus on the relationships between earth processes and human societies. The major is similar to a physical geography major at other colleges and universities. From Earth Science, students gain an understanding of natural processes that govern resources such as water, fossil fuels, and soil, and also examine hazards that impact human settlements, such as flooding, landslides, and earthquakes. From Geography, students learn about the spatial distribution of physical and human phenomena and how human societies are shaped by, and also change, the natural world.

First-year students interested in exploring the Earth Science and Society major should take Earth, Environment and Humanity (Earth Science/Geography 151) and Global Geography: People, Places, and Regions (Geography 102).

Students majoring in Earth Science and Society take roughly half their major sequence in Earth Science and half in Geography. Focal themes include physical geography—understanding patterns and processes that shape landscapes, with emphasis on climate, soils, water, landforms, and natural hazards; or land and resource analysis—the study of the uneven distribution of resources, such as agricultural soils, water, or energy, implications of this unevenness for human societies and for sustainable development. The department encourages field work and collaborative research with faculty.

Recent majors in Earth Science and Society have gone on to careers in fields such as renewable energy research, natural hazard risk mitigation, environmental health, and science writing.

For further information, see <http://earthscienceandgeography.vassar.edu>.

Economics

Economic forces shape many aspects of society and profoundly influence our daily lives. The study of economics at Vassar deepens students' understanding of these forces and helps equip them for positions of leadership in today's world. Whatever their intended majors, students will find exposure to the topics and methods of economics to be valuable. It will sharpen their reasoning skills, broaden their acquaintance with important economic issues, and deepen their understanding of government policies, business behavior, and personal decision-making. A good background in economics helps open doors to careers in a variety of fields

including finance, law, public policy, international affairs, and the media. Students should also note that introductory economics is frequently a prerequisite for courses that are an integral part of multidisciplinary programs of study.

The study of economics at Vassar begins with Introduction to Economics (ECON 102). This course introduces students to the national economy and to the function of markets in the economic system. In 2018-19 there will be 10 sections of ECON 102 offered in the fall semester and only a few in the spring semester. Students wishing to take this course in 2018-19 should consequently endeavor to do so in the fall semester. Those who wish to continue in economics may then take a 200-level elective in the spring semester as several will be offered having just ECON 102 as a prerequisite and with spaces reserved for first-year students. Such students should also be mindful of the calculus requirement for the economics major and of the calculus prerequisites for ECON 201 and ECON 209.

A typical path through the major sees the student taking ECON 102, MATH 121, MATH 126 and possibly a 200-level elective in their first year and then ECON 200, ECON 201, and ECON 209 and possibly a 200-level elective in their second year. It is strongly recommended that all students intending to study economics during their junior year away take at least ECON 200, ECON 201, and ECON 209 by the end of their second year.

Students whose transcripts indicate that they have received Vassar College credit for *both* AP microeconomics and macroeconomic or for IB economics need not take ECON 102 to complete the economics major and will be considered to have taken that class for prerequisite purposes.

First-year students may not take 200, 201, or 209 but they may take other courses numbered 200 and above in their second semester provided they have satisfied the prerequisite requirements.

Potential economics majors with AP or IB credit in mathematics should see the "Mathematics" section below for placement advice.

Education

The major in educational studies challenges students to think deeply and critically about the ways in which schools socialize as well as educate citizens. It provides ongoing opportunities for conceptual integration across disciplines and domains of theory, policy, and practice. This interdisciplinary approach encourages students to study the impact of political, historical, cultural, economic, and social forces on education. Requirements for the major in educational studies press students to develop a solid foundation in learning theory, the social foundations of education, as well as a global perspective on education. Individuals who complete a major in educational studies are prepared to integrate and apply knowledge to guide personal action and development, regardless of their ultimate career trajectory. The major is an excellent option for students who are interested in issues related to education—but who are not planning to earn a teaching credential at Vassar.

The teacher preparation programs in the Department of Education reflect the philosophy that a broad liberal arts education is the best foundation for teaching, whether at the elementary or secondary level, and whether in public or private schools. See the section on "Preparation for Teacher Certification" earlier in this handbook for further information.

The educational studies correlate is offered both to students who plan to teach and those who are interested in pursuing other pathways related to education. Under the supervision of a member of the department, students undertaking the correlate will design a sequence of courses that address a central topic or theme related to education. Completing these courses should challenge students to think comprehensively about the manner in which schools socialize as well as educate citizens, and how the interests of certain stakeholders are privileged or neglected.

The Education Department, in conjunction with University College, Galway, offers a one-semester internship in the primary and secondary schools of Clifden, Ireland.

For more information, please visit <http://education.vassar.edu>.

English

The Art of Reading and Writing (English 101) is open only to first-year students and offers an introduction to the study of English at the college level. In this course we study literature as an art—that is, as the formal and inventive representation of experience in poetry, fiction, and drama—as well as nonfiction writing including essays, journals, and letters. We also attend to the social and historical contexts within which literary forms arise and change. The focus of English 101 varies, but each section includes substantial reading in more than one genre, regular exercise in writing, and active discussion.

In addition to English 101, the department offers Texts and Contexts (English 170), which is open to first-year students, sophomores, and others by permission. Those who have taken English 101 in the fall semester and who wish to continue in English are advised to elect English 170 in the spring of the first year. Students may not elect both English 101 and English 170 in the same semester, nor take either course twice.

Students who receive a 4 or 5 on the AP examination in English Language and Composition or English Literature and Composition may elect English 101 or English 170 in the fall semester. AP students may also seek placement in a 200-level course in the fall semester. They must choose from a list of approved courses, which will be made available at the English AP advising meeting during orientation. First-year students with AP scores of 4 or 5 may also elect, with the permission of the instructor, a 200-level course in the spring. No student scoring lower than 4 will be eligible for placement in English 170 or a 200-level course in their first term at Vassar.

The department's 200-level creative writing classes are not open to first-year students, even those with a 4 or 5 on

the AP examination, but in the Spring any first-year student may enroll in English 180, Creative Writing for First-year Students.

For detailed descriptions of the English 101 courses offered this year, please see the section of this handbook on *First-Year Writing Seminars*.

For more information about all the courses offered by the Department of English, please visit <http://english.vassar.edu>.

Environmental Studies

Vassar's multidisciplinary Program in Environmental Studies involves the natural sciences and social sciences as well as the arts and humanities. Approximately 40 professors from virtually every department on campus participate in the program. Students choose a disciplinary concentration, which can be in any department (from biology to art), and view environmental issues through the perspective of that discipline. They also take multidisciplinary courses on environmental issues offered by the program itself. These courses, often team-taught by professors from two different disciplines, include the introductory seminar, *Environmentalism in Perspective* (Environmental Studies 125), as well as special studies courses that analyze significant environmental problems. The special studies courses for 2018/19 include *Racism, Waste and Resistance* (Environmental Studies 266) and *It's Only Natural: Contemplation in the American Landscape* (Environmental Studies 270). The program's senior seminar includes a practicum involving a group project focused on a local or regional environmental issue. First-year students considering a major in environmental studies are encouraged to take *Essentials of Environmental Sciences* (Environmental Studies 124) and/or *Environmentalism in Perspective* (Environmental Studies 125). Please look at the program website for a list titled "Courses to Consider" of other environmentally relevant courses.

Vassar's location in the Hudson River Valley, one of the world's great watersheds, and its proximity to New York City position students well for both rural and urban ecology study. The program concerns itself both with traditional "green" issues such as conservation and sustainability and with environmental issues of social justice. Graduates from the Environmental Studies Program go on to pursue graduate education in areas such as urban ecology, environmental policy, public health, environmental law, and environmental management. Others go on to a wide variety of careers in which a multidisciplinary perspective is valuable, including environmental education, environmental consulting, sustainable agriculture, green architecture, marine conservation, and environmental journalism.

For further information, please visit <http://environmentalstudies.vassar.edu>.

Film

The film major emphasizes the study of narrative, documentary, and avant-garde films. The concentration includes a range of courses in international film, American film, film

history and theory, film and video production, and screenwriting. In connection with its courses, the department screens hundreds of films each year. The Vassar library also houses a DVD collection of more than 13,000 titles, which are freely available.

We encourage first-year students to widen their exposure to films of all countries, styles, and time periods. First-year students are also welcome at department lectures and screenings.

First-year students may enroll in *Introduction to Screen Arts* (Film 175), offered every spring semester. Sophomores should plan to take *World Cinema to 1945* (Fall Semester: Film 210) and *World Cinema after 1945* (Spring Semester: Film 211). An introductory course in filmmaking, *Film 240: Foundations*, can be taken simultaneously with *World Cinema*. Intensive workshop courses in film and video production are offered to students during their junior and senior years at the college. Note that the Film Department does not accept advanced course placement for high school coursework.

The Film Department's facilities in the Vogelstein Center for Drama and Film include modern classrooms with smart podia; a screening room with surround sound and 35mm and advanced digital projectors; a studio equipped with a flexible set and a lighting grid; a room devoted to sound recording containing a whisper booth; 2 editing suites; and a high tech multimedia laboratory.

First-year students interested in work/study positions or in participating in junior and senior film projects as actors or production assistants are welcome to send an email of interest to the department administrative assistant at film@vassar.edu.

For more information, please visit <http://film.vassar.edu>.

French and Francophone Studies

The Department of French and Francophone Studies (FFS) offers students a global perspective on the French-speaking world through a combination of language study, critical cultural studies, historical contextualization, and linguistic and cultural immersion. The FFS curriculum is designed to promote understanding and awareness of the language, literatures, and cultures of the French-speaking world. Recent FFS graduates now enjoy careers in wide-ranging fields including teaching, translating, the arts, publishing, law, banking, management, business, government and non-profits, and medicine.

Except for our First-Year Writing Seminar (FFS 170), all courses are conducted in French. Only students who have never studied French are permitted to begin in French with the yearlong FFS 105-106, usually followed by FFS 205. All other students should take the online placement exam located at <https://french.vassar.edu/students/#g1q2> before pre-registering in July. Use the password "chicago-hall" to take the test. Students should also consult with FFS faculty at the departmental advising session during orientation. Students who have taken two years of French in high school normally elect FFS 205. Students who have taken

one or two years of French and who do not place into 205, may elect FFS 109 to complete the equivalent of 105-106. Those who have taken three years of French in high school normally elect French 206. Students who have taken four years of French in high school normally elect FFS 210 before moving on to FFS 212 or upper 200-level courses.

Note however, since high school experiences may vary, taking the online placement exam and conferring with departmental faculty ahead of time is the best way for students to maximize their chances of getting into the course appropriate to their level. There is considerable movement between courses during the add/drop period as instructors continue to advise students who might have registered for a course above or below the level most appropriate for them. Students should not feel alone in this process and are encouraged to consult with department faculty during the add/drop period as needed regarding what course to take.

Students are encouraged to avail themselves of all the opportunities to speak and hear French in informal situations (bi-monthly Café-conversation, French Club, French films, the French book club, conversation with the language fellow and academic interns, watching TV5 in the French lounge or French and Francophone news via the internet). Two native speakers of French--the language fellows--will be in residence.

Students interested in pursuing a major or correlate sequence in French and Francophone studies should consult the chair or another member of the department as early as possible. Students who receive a 4 or 5 on the AP examination may count their AP credit as 1 unit toward the major or correlate. Some students elect to take an accredited summer course after their first year in order to accelerate their program. It is strongly recommended that qualified students spend one or two semesters of their junior year in France or another French-speaking country. The department website provides information on study abroad programs, including the Vassar-Wesleyan Program in Paris. Students can also find information about the Vassar-Wesleyan Program in Paris at <http://en.vwpp.org>.

Some majors combine FFS with a major in an interdepartmental or a multidisciplinary program such as *Africana Studies*, *Environmental Studies*, *International Studies*, *Medieval and Renaissance Studies*, or *Women's Studies*. Others combine FFS with a departmental concentration such as history, art history, economics, political science, or another language. Individually tailored majors involving French and Francophone Studies, such as comparative literature, can be created through the Independent Program.

For more information, including meeting the College language requirement, please visit <https://french.vassar.edu>.

Geography

Many of our most interesting and urgent questions today occur at the intersections of society, space, and environment. Geographers study these problems by examining uneven spatial and social distributions of power and resources. This approach allows us to anchor general explanatory frameworks in the real communities and environments in which

they play out. How does climate affect food production? How does uneven distribution of power produce conflict on international borders? How do planners design equitable and sustainable cities? Students learn a variety of analytical and research skills to answer questions like these. We use field research to understand how theory intersects with the empirical world around us. We use mapping and GIS (geographic information systems), and cognitive geography to evaluate relationships among factors such as settlement patterns, resources, climate change impacts, or poverty. Theoretical frameworks such as political ecology, world systems, socio-nature, placemaking, symbolic landscapes, and the production of space help us understand power relations among places and peoples. If you are interested in integrative problems of society, justice, environment, planning, and policy, Geography provides a disciplinary home in which to develop critical reading, writing, and analysis skills to understand these challenges.

Geography majors go on to a variety of careers, such as policy, urban planning, environmental consulting, environmental agencies, community development, law, and many other fields. Among the specific skills you will learn in Geography classes are GIS (geographic information systems); written and verbal expression; critical reading of texts, maps, and urban landscapes; and geographic research methods.

Interested first-year students should take Geography 102, *Global Geography: Place-Making in the Modern World*. This course examines major contemporary issues such as the impact of environmental changes on local communities, impacts of climate change on societies, uneven development of the global political-economic system, the implications of nation-states and borders, cultural landscapes, and differentiated urban space, as well as mapping and cartographic communication.

Following Geography 102, students may choose from a variety of 200-level courses, such as *Population, Environment, and Sustainable Development* (GEOG 266), *Urban Geography: Space, Place, Environment* (GEOG 250), *GIS* (GEOG 224), or *Economic Geography* (Geog 276). To major in Geography, students take 11 units, including *Global Geography*, a methods course, and three units at the 300 level. A number of courses in Earth Science also count toward the major.

For further information, see <http://earthscienceand-geography.vassar.edu>.

Geography-Anthropology

Geography and Anthropology share common interests in social and spatial structures, cultural and symbolic landscapes, and human-environmental relations. For students wishing to integrate the perspectives of both disciplines, from research methods in anthropology and ethnography to GIS analysis and political ecology, this interdepartmental concentration combines the perspectives of Geography and Anthropology in examining the cultural, ecological, and spatial relations of societies and the environmental systems in which they develop.

Students take courses in both Geography and Anthropology for this major. Interested first-year students should take GEOG 102, Global Geography: Place-Making in the Modern World as well as an introductory (100-level) course in Anthropology, such as ANTH 100, Archeology; ANTH 120, Human Origins, or ANTH 140, Cultural Anthropology.

Requirements for a concentration include 13 units, with at least 6 units in each field. The 13 units include at least two introductory courses, at least 3 units at the 300 level, a methods course (such as GIS), and Anthropological Theory.

For further information, see <http://earthscienceandgeography.vassar.edu>.

Geology (see Earth Science)

German Studies

The Department of German Studies offers an integrated and holistic approach to the study of language, literature, and culture. This approach embodies Vassar's liberal arts principle of "going to the source" by engaging with primary documents and by exploring the fundamental debates and processes that have shaped German culture and its relationship to the contemporary world. Germany's location at the intersection between Eastern and Western Europe, as well as the size of its economy, continues to make German an advantageous language in today's global world, while Germany's history and culture continue to pose significant questions for our contemporary society.

The department's faculty has developed an innovative curriculum that redefines what language study means. In particular, the department seeks to provide students with intellectual engagement at all levels of the curriculum. Thus, rather than merely memorizing grammar rules and vocabulary, the department's language courses are organized around a sophisticated study of engaging topics that facilitate language learning, such as childhood, contemporary identity, and media politics. Because the department's faculty participates actively in many of the college's multi-disciplinary programs, German Studies courses feature interdisciplinary methods and topics. Finally, the relatively small size of the program enables an individualized course of study in which students develop close working relationships with faculty members. The German Studies Department also offers study abroad opportunities through its close and long-standing association with the prestigious Berlin Consortium for German Studies.

During new student orientation, students can consult with faculty about the appropriate courses to take. First-year students who have never studied German should enroll in the year-long Beginning German (German 105-106) or Intensive Beginning German (German 109), a two-unit, one-semester course offered in the spring semester. Generally, students with less than two years of German in high school should enroll in German 105 or 109; students with more than two years and less than four should register for German 210; students with more than four years of

high school German should enroll in German 230 or 240. Students who receive a score of 4 or 5 on the AP examination in German language or German literature should register for either German 210 or German 230/240 and should consult with the department during orientation.

In addition to these courses in German, the department also offers several courses in English translation. In 2018-19, these include a First-Year Writing Seminar (GERM/CLCS 182); German Film (GERM/FILM 265); and a new course that is cross-listed with Media Studies (MEDS/GERM 287). All these courses are open to first-year students.

In addition to courses, the department offers additional opportunities for practicing German through the weekly *Kaffeeklatsch*, film showings, and get-togethers with our German language fellow.

For more information, please visit <http://german.vassar.edu>.

Greek (See Greek and Roman Studies)

Greek and Roman Studies

Students who study in the Greek and Roman Studies Department explore aspects of the ancient Mediterranean world with an emphasis on the cultures of Greece and Rome. At the heart of this exploration are the languages of the Greeks and the Romans as well as their literature, history, art and architecture, philosophy, religion, politics, relations with the other peoples of the Mediterranean, and reception and interpretation by later cultures.

The story of "classical" scholarship goes back to the Library of Alexandria in the 4th and 3rd centuries BCE. The project that the scholars of the library undertook was to collect, copy, and edit as many texts of Greek literature as they could find. The study of the Greeks and Romans still has, at its core, this act of preservation. But, like the Alexandrian scholars and perhaps more self-consciously, we acknowledge that we are also involved in an act of reinterpretation. Our goal is both to preserve the knowledge of ancient cultures but also to interpret that knowledge in the context of contemporary culture.

We bring to this project many different skills and many different methods. Again, at the heart of the enterprise are the philological skills that the Alexandrian scholars developed: the ability to look back at a "dead" language and imagine it in its living form so as to read texts as richly as possible. An ancient historian adds to this skill the ability to gather disparate kinds of fragmentary evidence, both literary and material, to reconstruct both the major national and international events that shaped these cultures as well as the day-to-day texture of life. In this they rely heavily on archaeologists who uncover the physical traces of the past and attempt to establish a chronology and a function for these remains. Literary scholars not only find evidence in works of literature for the aesthetic principles that govern the creation of literary works of art, but also apply modern theoretical approaches that allow us to see literature as a reflection of social, political, and religious assumptions.

But in the end every student of Greek and Roman studies is using insights about the ancient world to enrich his or her understanding of our modern world. What classicists develop is an intense self-consciousness about the nature of their own assumptions, fashioned by the world in which they live—assumptions that the study of antiquity allows us to question, that we must question, in order to be able to focus our attention on the strange "otherness" of different cultures that have much to teach us.

Students interested in learning Greek or Latin, or who have done so only briefly, should take Elementary Greek (Greek and Roman Studies 127, a one semester intensive course taught in the spring) or Elementary Latin (Greek and Roman Studies 145-146, a year-long course); these courses cover the essentials of grammar and include short readings from ancient texts. Those who have had two or more years in high school should consult with a member of the department, who may direct them to a higher-level course. Courses in English, for those interested in ancient societies, include the introductory courses, Then and Now: Reinterpreting Greece and Rome (GRST 100), Civilization in Question (GRST 101), and two First-Year Writing Seminars (GRST 187 and 188). We also offer a wide variety of other courses in translation at all levels. Please consult the course catalogue for the most up-to-date listings; many 200 level courses do not have a prerequisite.

For more information, please visit <http://greekandromanstudies.vassar.edu> and on Facebook <https://www.facebook.com/Vassar-Classics-Greek-and-Roman-Studies-119734821509197>. You are also welcome to contact Rachel Friedman, Chair of the Greek and Roman Studies Department, at rafriedman@vassar.edu.

Hispanic Studies

The curriculum in Hispanic studies has a twofold purpose: to teach the skills required to understand, speak, read, and write the Spanish language and to guide the student in the search for an understanding of the literatures and cultures of Spain and Latin America. Normally, all courses in the department are taught in Spanish.

Students entering Vassar with less than two years of high school Spanish and who wish to begin the study of the Spanish language in the first year should enroll in the yearlong Hispanic Studies 105-106. For students with some background in Spanish who wish to continue to study the language, please use the following guidelines when selecting the appropriate level: with one-two years, Hispanic Studies 105/106; two-three years, Hispanic Studies 205; three years, Hispanic Studies 205; four or more years, Hispanic Studies 206. Successful completion of the introductory sequence, Hispanic Studies 105-106, or of any one semester course at a higher level suffices to meet the college language requirement. Additional guidance about appropriate placement will be available during New Student Orientation.

In addition to formal course work, the department sponsors a weekly Café Sur designed for informal conversation practice and cultural activities in our lounge in Chicago Hall. The department also sponsors film festivals,

lectures and multicultural celebrations (Black History month, Hispanic Heritage month and Indigenous People's day). All activities—open to all students—are directed by the Hispanic studies language fellow, a recent graduate of a Spanish or Latin American or Spanish-speaking Caribbean university. The language fellow also assists with the conversation sections of Hispanic Studies 206.

The department sponsors a study abroad program in Madrid, Spain. The academic year program, located at the Universidad Carlos III in Madrid, is co-sponsored by Wesleyan University. This program, normally taken during the junior year, may be elected for either the semester or the full year. To qualify, students must have completed Hispanic studies 216 or its equivalent. Courses in the Vassar-Wesleyan Program in Madrid are listed in the catalogue at the end of the section on Hispanic studies. Hispanic studies majors are encouraged to study in a Spanish-speaking country during their Vassar career.

For more information, please visit <http://hispanicstudies.vassar.edu> or email hispanicstudies@vassar.edu.

History

The History Department at Vassar College has a distinguished tradition of helping students "go to the source" as they take up the craft of history. From the beginning, students learn how to examine historical problems using the rich resources of the library and presenting their findings in class discussions, presentations, and papers. All courses stress the examination of both original sources and historical interpretations. The aim throughout is to help students develop skills in independent research, critical analysis, and imaginative synthesis.

We strongly recommend that students begin with a 100-level course. First-year students, whatever their academic background, tend to find our introductory classes quite different from any history course they have taken in the past. These courses include extensive class discussion, deep engagement with original historical documents, and independent research. Different 100-level courses introduce students to the diverse histories of Africa, Asia, Europe, Latin America, the U.S., and the modern Middle East.

Incoming Vassar history students frequently ask whether they can "place out" of 100-level courses and begin at the 200-level. Ordinarily, one 100-level history course in any field is the prerequisite for enrolling in a 200-level history class. However, students who receive a score of 4 or 5 on the AP examination in American or European history may wish to consider taking 200-level history courses. If you have such a score, and if you believe your background prepares you to enroll at the 200-level, you should consult the instructor by email or attend the first class session and ask the instructor to consider your request. If you become a history major and you received a 4 or 5 on an AP history exam (U.S., European, or World), you may count at most one AP credit toward the 11 units required for the major. AP credits cannot be used to fulfill the major's distribution requirements. Alternately, students who have participated in the International Baccalaureate (IB) program and have earned

a score of 5, 6, or 7 on the Higher Level Examinations may count that as one of the 11 units required for the major. The department also offers a correlate sequence that permits students to combine a sequence of six history courses with a major in another discipline. More information can be found in our History Handbook, available in the front foyer of Swift Hall, just to the left of the stairway. Feel free to stop by and pick up a copy, or explore the History Department website for more information about our faculty, course offerings, Majors Committee, department activities, and the recently established Evalyn Clark Travel Awards for history majors.

History faculty are most willing to advise first-year students, whether or not they are considering a major. Arriving students with questions about the history program—especially prospective majors—are cordially invited to visit the department in Swift Hall and introduce themselves to the department chair, Lydia Murdoch. Her office is Swift Hall, Room 304. She is best reached by email (lymurdoch@vassar.edu) for an appointment or consultation.

For more information, please visit <http://history.vassar.edu>.

Independent Program

The Independent Program exists to allow the study of subjects of interest to a student that can only be approached in a multidisciplinary way and for which Vassar does not already have a formalized interdepartmental or multidisciplinary program. For example, a student wishing to understand the roots of human behavior might propose an Independent major and draw upon courses in sociology, biology, psychology, anthropology, religion, and history, to name a few of the most obvious. Alternatively, the same student might major in a multidisciplinary program such as neuroscience and behavior or women's studies, or study the roots of human behavior from the point of view of a single discipline.

The Independent Program will accept proposals from students who wish to elect a field of concentration that is not provided by one of the regular departments, interdepartmental concentrations, or multidisciplinary concentrations of the college. Prospective majors must first meet with the director of the Independent Program, by the beginning of their sophomore year, before starting the process of making a formal application. The formal application may then be submitted to the director, who will take it to the Independent Program Committee. The Independent Program Committee will then evaluate the proposal. A proposal may be accepted, sent back to the student for revisions, or denied. The committee may suggest ways in which a student can explore an area of study through some department or program that already exists at the college. If admitted to the Independent Program, the student follows the agreed upon course of study, culminating in the senior thesis, under the continuing guidance of two faculty advisors. The variety of major concentrations is made possible both by the breadth of Vassar's curriculum and by access to courses at other institutions through various exchange programs.

For more information, please visit <http://independent-program.vassar.edu>.

Interdepartmental Courses

Vassar students may train as required for state certification as an emergency medical technician by taking a yearlong EMT Training course (INTD 150-151) for 0.5 units of credit each semester. It is expected that the students who complete the training will serve on the Vassar EMT squad. See the Vassar catalogue for more details.

International Studies

International Studies (IS) is a multidisciplinary program that allows students (in consultation with the program's director and the panel of advisors) to design a course of study that draws on courses from across the Vassar curriculum. The program's faculty come from various departments and programs, including anthropology, Asian studies, Chinese and Japanese, economics, education, environmental studies, French and Francophones studies, geography, German studies, Hispanic studies, history, Latin American and Latino studies, philosophy, political science, sociology, and urban studies.

Although the international studies major is flexible, there are specific requirements for majors to follow to ensure a coherent plan of study. Majors must, for example, complete work at the advanced seminar level in two disciplines; complete intermediate level work in three social sciences, and complete a thesis by the end of senior year. In addition, IS majors must demonstrate proficiency in a language corresponding to the geographic area selected by the student as his or her area of focus.

IS majors generally spend all or part of their junior year at academic institutions overseas. In the last several years our students have attended universities in Argentina, Belgium, Brazil, Chile, Cameroon, China, England, France, Germany, India, Italy, Japan, Jordan, Kenya, Morocco, Madagascar, Malaysia, Russia, Taiwan, Uganda, and South Africa.

As part of the program, International Studies sponsors an annual study trip, open to all Vassar students, credited as a semester course. Over the years, students have traveled to Indonesia, Jamaica, Russia, Vietnam, Zimbabwe, Kenya, Cuba, Brazil, China, Morocco, Lesser Antilles, Chile, Mexico, and Spain. Students learn about the culture, economics, history, language, and political situation of the area they will visit.

To ensure the effectiveness of their proposed course work, international studies majors consult regularly with professors. For the senior thesis, majors work with two advisors from different departments.

For more information, please visit <http://international-studies.vassar.edu>, or contact the program director.

Italian

The Italian Department offers a variety of courses in Italian language, literature, cinema, and general culture. Besides achieving fluency in spoken and written Italian, through our courses students explore the debates that have shaped Italy over the centuries and its important contribution to humanistic culture. All courses in the department, from introductory language instruction to advanced seminars, are

typically taught in Italian. First-year students with no previous experience in Italian should take the yearlong Italian 105-106, which is an introduction to the language and culture of Italy through short stories and plays, opera and popular music, and film and popular culture. Skits and other student-centered activities integrate grammar and vocabulary study to promote practical communication in the classroom and beyond. All students with previous knowledge of Italian will be placed in the appropriate courses after an interview with the department chair. An oral and written exam may be used for advanced placement or to fulfill the Foreign Language Proficiency requirement.

To coordinate the different language activities, a native Italian language fellow will be in residence. Students are encouraged to attend extracurricular activities organized by the department and by the Italian Majors' Committee, such as opera events at the Metropolitan Opera House, the Italian Cinema Club, and cooking classes.

Italian majors and correlates are encouraged to spend a semester or a year in Italy, usually during their junior year. In conjunction with Wellesley College and Wesleyan University, Vassar offers the Eastern College Consortium (E.C.Co.) Program in Bologna, Italy, where students take courses at the program center and the University of Bologna. To qualify, students must complete four semesters of Italian. Typical correlate combinations include art history, studio art, drama, film, medieval and Renaissance studies, history, women's studies, and international studies.

For more information, visit <http://italian.vassar.edu> or email the chair, Simona Bondavalli at Sibondavalli@vassar.edu.

Japanese (See Chinese and Japanese)

Jewish Studies

Jewish studies offers a multidisciplinary approach to the diversity of Jewish experience. This approach involves studying the creation and reproduction of Jewish culture in multiethnic societies in the ancient, medieval, modern, and contemporary worlds as well as such subjects as languages and translations, texts and images, diaspora and Zionism, law and religion, and the cultural construction of Jewish identities. The program is supported by instruction in Hebrew language from elementary through advanced levels, with opportunities to study abroad in Israel and elsewhere during the junior year. Yiddish language at the elementary and intermediate levels is available through the Self-Instructional Language Program, as is special instruction in Aramaic, the language of the Talmud. Because a large and important population of Jews in the pre-1948 era lived in the linguistic and cultural milieu of Arab lands, students may wish to consider taking advantage of the Arabic language curriculum in support of their work in Jewish studies.

Jewish studies draws upon faculty from a wide variety of departments including anthropology, Greek and Roman studies, English, geography, German studies, Hispanic studies, history, political science, psychology, and religion, reflecting the multidisciplinary orientation of the field.

The program strongly recommends that students pursue one of the many options that exist for a junior year abroad experience. Students are encouraged to begin discussions about this with their professors as soon as possible. In addition to the core courses in Jewish studies, the program is supplemented by an ample list of approved courses on topics in Jewish culture offered in the constituent disciplines of the field (consult the catalogue under "Jewish Studies"). These courses, along with approved courses taken in a junior year abroad, may be credited to the major or correlate sequence. Requirements for the major and correlate sequence are detailed in the catalogue; in brief, students chart their own paths through the diversity of disciplinary methodologies and subject areas, establishing their own points of significant intersection, thus contributing to the definition of this field of study. No prior background in the study of Jews or Judaism, whether of a religious or cultural nature, is assumed.

For more information, please visit <http://jewishstudies.vassar.edu>.

Latin (See Greek and Roman Studies)

Latin American and Latino/a Studies

The Latin American and Latino/a Studies Program provides a multidisciplinary approach to the study of Latin America and the Latino/a populations of the Americas. The program emphasizes knowledge of global politics, economics, histories, cultures, and nations as theorized, imagined, and practiced through Latin/Latino/a America. Participating faculty are drawn from the following departments: anthropology, economics, education, English, geography, Hispanic studies, history, political science, and sociology.

A reading knowledge of Spanish or Portuguese is required for majors; deeper knowledge of the relevant language is recommended. An introductory course in Latin American and Latino/a studies and a senior seminar are required, as is a course in history and in Latino/a studies. Majors are expected to elect work above the introductory level in at least three departments and are encouraged to pursue a structured academic experience relevant to the student's program beyond Vassar during the junior year, either in Latin America or at an appropriate domestic institution. In the senior year, majors may choose to write a senior thesis or conduct a senior project under the guidance of two professors from different disciplines.

First-year students interested in the program may take Conceptualizing Latin and Latino/a America (Latin American and Latino/a Studies 105), offered in the spring semester. LALS 105 offers a multidisciplinary exploration of the worlds of Latin and Latino/a America, drawing on the expertise of LALS participating faculty to introduce students to critical themes and issues that shape the realities of Latin American and Latino/a worlds. Topics to be treated may include gender and development, the formation of national identities, urbanization and uneven development, revolution, indigenous rebellions and resistance, the politics

of memory, plantation economies and their environmental impact, human rights education and peace building, immigrant children and education, and questions of cultural citizenship. Prospective majors are strongly encouraged to take this course.

For more information, please visit <http://latinamericanstudies.vassar.edu>.

Mathematics and Statistics

Mathematics is one of the oldest learned disciplines. Statistics provides one of humanity's best ways to gain information in the face of uncertainty. Both contribute to the foundation of our understanding of much of the physical world, and they are essential for the study of modern developments in the social sciences. Our graduating majors are very much in demand in teaching, the business world, and the computing professions. A strong background in mathematics and statistics also increases an applicant's chances of admission to law and medical schools and to graduate programs in engineering, economics, and business management. Mathematics and statistics are essential for graduate programs in computer science and in the physical sciences.

The department offers a number of course sequences for first-year students. For any questions of placement, please consult the department during the departmental advising sessions.

First-year students who have taken a year of calculus in high school should enroll in one of the following depending on their particular background: Calculus IIA: Functions and Integration (Math 126, a six-week course), Calculus IIB: Sequences and Series (Math 127, a six-week course), or Multivariable Calculus (Math 220). Math 126 together with 127 will satisfy the QA requirement, and these courses may be taken in either order. However, many students will need only Math 127 to progress to the 200-level. These students can fulfill their QA requirement by enrolling in Math 220.

First-year students who have had little or no calculus in high school should enroll in Single Variable Calculus (Math 121), which begins with first principles. If such a student plans a major in the sciences or plans to take additional courses in mathematics, it is recommended that Math 121 be followed by Math 126 and 127 during their first year.

Here is some general advice for students wishing to pre-register in a math or stats course:

Students who receive a 4 or 5 on the AP Calculus BC examination should elect Math 220. Students who earn a 3 or below on the BC examination will ordinarily take either Math 127 alone, or Math 126 and Math 127 but must discuss their placement with the department.

Students who receive a 4 or 5 on the AP Calculus AB examination are advised to elect Math 127. Students with a 3 or below on the AB examination are advised to enroll in Math 126 and Math 127. But students should confirm these placements by consulting with the department during the departmental advising sessions.

Students with a full year of calculus, through IB or in some other setting, may sign up for 126/127 or 220 in

advance and consult with the department during orientation to be sure of the correct level of placement.

Students who receive a 4 or 5 on the AP Statistics examination are advised to elect Math 242 if they are interested in continuing their study of statistics. Students with a 3 or lower on the AP Statistics examination should elect Math 240 to continue statistics studies. Students interested in statistics who have not had any exposure to statistics should consider Math 141 or Math 240 after consultation with the department.

Any student without AP credit in Calculus can still receive 1 unit of advanced placement credit by performing well enough on a written Calculus Credit Examination given by the department in early September. The time and place of the Calculus Credit Examination will be posted on the Mathematics Department bulletin board in Rockefeller Hall and announced in classes. The first part of the examination covers limits, differentiation and its applications, graphs, the definite integral and area, and polar coordinates. The second part covers exponential, logarithmic, and trigonometric functions and their inverses; techniques of integration; volume and arc length; indeterminate forms; and simple differential equations.

Any of the following satisfies the pre-medical calculus requirement: Math 121/126/127, Math 126/127, Math 220. The department also offers Introduction to Statistical Reasoning (Math 141) and Introduction to Statistics (Math 240). Math 141 is not open to students who have a 4 or 5 on the AP statistics exam.

It is important that students considering a major in mathematics complete Math 220 and 221 by the end of the sophomore year. Consequently, Math 121/126/127 should be completed by the end of the first year. The department encourages its majors to design well-balanced programs with representative courses from the arts, foreign languages, humanities, physical sciences, and social sciences.

For more information, please visit <http://math.vassar.edu>.

Media Studies Program

The Media Studies Program offers students a multidisciplinary approach to the study of media culture. The program's curriculum provides students with the intellectual and creative tools to become sophisticated analysts of both contemporary and historical media environments, developing theoretical and critical skills that can be used in everyday experiences of media consumption and production. The program's curriculum includes considerations of the form and aesthetics of media objects, the history of old and new media technologies, the economic and organizational structure of media industries, indigenous and oppositional media forms, and the social implications of and ethical issues associated with various media.

The program includes a set of core courses that provides students with a strong base in media theory and analysis, beginning with a thoroughly multidisciplinary introductory-level class, Approaches to Media Studies (Media Studies 160), and culminating in a senior seminar and an individual

senior project for all majors. The specific focus of each student's program is tailored to individual student interests. Media studies majors work with a faculty advisor and the program director to design a plan of study from a set of approved courses from departments such as Anthropology, Art, Computer Science, English, Film, and Sociology, among others. Depending on the student's focus, however, the plan of study might well include courses not included on the approved list. Students are also encouraged to link their theoretical and critical study of media with hands-on, practice-based courses and/or internships in media-related workplaces. Because the media studies concentration incorporates courses originating within the program as well as a wide range of courses from other programs and departments, students wishing to major in media studies should consult with the program director as early as possible to design their course of study.

For more information, visit <http://mediastudies.vassar.edu>.

Medieval and Renaissance Studies

The Program in Medieval and Renaissance Studies allows students to engage in the cross-cultural study of art, history, literature, and thought from the fall of Rome to the 18th century. Students are expected to elect work from three groups of disciplines: art history and music; history, political science, philosophy, and religion; and language and literature. In addition, students are expected to gain a reading knowledge of requisite foreign languages and, in their senior year, write an interdisciplinary essay under the supervision of one or more of the participating faculty.

First-year students interested in medieval and Renaissance studies should consult with the director soon after arriving on campus. First-year students considering majoring in the program should elect some of the introductory courses in Greek and Roman studies, philosophy, religion, political science, and history during their first year at the college. Students should select introductory courses in the two disciplines that they hope to study at the higher level. Art 105-106 provides a grounding for the program, as do the historical sections of English 101. The Dark Ages (History 116) is a valuable introduction to medieval history, and the College Course 101, Civilization in Question offers a useful multidisciplinary and team taught approach to pre-modern readings. Students should think carefully about the language that they plan to take in the program. Latin is highly recommended for students planning to enter graduate school in medieval studies. Since many majors study abroad, it is wise to begin or continue a language appropriate to the country in which students anticipate studying.

For more information, please visit <http://medievalandrenaissancestudies.vassar.edu>.

Music

Music is studied at Vassar in each of its distinct but interrelated aspects: theory, history, composition, and

performance. First-year students may choose from among Fundamentals of Music (Music 101), Harmony (Music 105/106), Introduction to World Music (Music 136), and private lessons including piano, jazz piano, organ, harpsichord, voice, violin, viola, cello, double bass, flute, oboe, clarinet, bassoon, saxophone, French horn, trumpet, trombone, tuba, percussion, classical guitar, jazz guitar, and harp. Students interested in performing in an ensemble may audition for the Vassar College Choir, Chamber Singers, Women's Chorus, Jazz Combos, Jazz Ensemble, Orchestra, Chamber Music, and Wind Ensemble.

Music Major: For those students planning on majoring in music or pursuing a correlate, Music 105/106 should be taken in the first year if possible, as these courses are prerequisites to all subsequent courses in the major and most of the correlates. Music 105/106 is a study of tonal harmony in the 18th and 19th centuries and requires familiarity with the rudiments of music.

Correlate Sequence: Students may elect to pursue a correlate sequence in Music and Culture, Composition, History, Theory, or Performance (new!).

Non-Majors: Music 101 (offered both semesters) is a study of musical fundamentals and requires no previous musical training. Music 136 focuses on various topics in music of non-Western cultures; neither may be counted toward the major.

Advanced Placement: An advanced placement test is offered during orientation week for those students who have had previous work in basic harmony and musicianship skills to determine whether they can be excused from Music 105 and/or Music 206. A student may receive college credit if appropriate proficiency is demonstrated.

Auditions for Lessons and Ensembles: An audition is required for all voice and most instrumental lessons. Starting Monday, August 27, 2018, audition sign-up sheets for ensembles and voice lessons will be online at <http://music.vassar.edu/auditions> and all other lesson and audition sign-up sheets will be posted on the board outside Skinner 105. Enrollment is limited in each instrument with preference given to music majors and those students electing credited lessons.

Co-requisite Requirements: The Music Department believes that music performance in a liberal arts environment should be studied in the context of some knowledge of music history and theory. Therefore, students taking lessons for credit are required to take at least one music course no later than the third semester of study and, if continuing with lessons, must complete two courses by their junior year. First-year students and first semester sophomores are especially encouraged to take at least one of the following: 101, 105, 136, or 180.

Scholarships for Lessons: Scholarships for students electing credited lessons are available to those on financial aid for lessons in one instrument each semester. Eligible students must apply for the scholarship at the beginning of each semester. Please visit <http://admissions.vassar.edu/financial-aid/>.

For more information, please visit <http://music.vassar.edu>.

Neuroscience and Behavior

Neuroscience and behavior is an interdisciplinary program that applies the perspectives and techniques of biology and psychology to the study of the brain and behavior. Neuroscientists are interested in how the interactions of brain, body, and environment contribute to animal (including human) behavior. Neuroscientists study the structure and function of the nervous system, the development and evolution of neural and behavioral systems, and interactions among behavior, environment, physiology, and heredity.

Detailed study of different behavioral systems and different levels of organization raises many intriguing questions. How do the cells of the brain “learn”? How do various drugs alter both brain function and behavior? What kinds of environmental and social events influence how and when an animal will eat or mate? How do different animals communicate, whether it be humans using language or spiders vibrating a web?

Students interested in majoring in neuroscience and behavior will want to take introductory courses in biology and psychology in the first year. Please refer to the biology and psychology sections in this handbook for more information about these courses and about placement if you have AP credit. Typically, students begin to take the core courses of the major curriculum in the sophomore year.

For more information about the courses, the faculty, and what to do with a degree in neuroscience and behavior after graduation, please visit our website at <http://neuroscienceandbehavior.vassar.edu>. If you have questions that are not answered when you visit the website, please email neuroscienceandbehavior@vassar.edu.

Philosophy

Philosophy is the search to understand ourselves and the world by reflecting critically on the beliefs and values that shape our lives. What is the relationship between mind and body? Are there limits to what we can know? Are there objective moral truths? Are our own political and economic institutions just? Is there such a thing as beauty, and does it matter in art? At Vassar, we approach these and other questions from a variety of perspectives and traditions: ancient and modern; eastern and western; analytic and continental. We aim to help students at all levels learn to think, speak, and write with open-mindedness, clarity, and rigor.

First-year students may begin the study of philosophy by means of any of five courses open to them. This selection allows students to align their first philosophy course with their interests or plans for future study.

Philosophy 101 and 102 both study the history of Western philosophy through the great texts of this tradition. Philosophy 101 covers ancient Greek thought, with emphasis on Plato and Aristotle. Philosophy 102 surveys modern philosophy from Descartes to Kant. Both courses constitute an excellent background for understanding later debates in Western philosophy and provide conceptual tools to work in a variety of fields. These courses may be taken in any order.

Philosophical Questions (Philosophy 105) and

Philosophy and Contemporary Issues (Philosophy 106) provide an alternative approach to the subject. These courses are organized around philosophical problems rather than authors or periods. Philosophy 105 explores some traditional questions concerning the relation between the mind and the body, the nature of truth, the scope and limits of human knowledge, and the basis of ethics. Philosophy 106 investigates philosophical issues arising out of contemporary political and moral dilemmas. Both courses aim to help students develop their critical powers and philosophical views.

Philosophy 110 is an introduction to ancient Chinese philosophy, roughly from 500 to 221 BC, with a special focus on early Confucianism and Taoism. Topics discussed include human nature, methods of ethical education and self-cultivation, virtues and vices, along with the role of conventions and institutions of human life. This course assumes no background knowledge of philosophy, Chinese culture, or language.

For more information, please visit <http://philosophy.vassar.edu>.

Physical Education

The instructional program in the Physical Education Department offers 0.5 units of academic credit for courses in the following physical activities: badminton, basketball, bowling, fencing, flag football, fundamentals of conditioning, golf, indoor rowing, soccer, squash, swimming, tennis, triathlon training, volleyball, and weight training. Two courses, Introduction to Athletic Injury Care (Physical Education 110) and Nutrition and Exercise (Physical Education 210), are offered for one unit of academic credit. Students may also earn 0.5 credits for participation on a varsity athletics team with approval from the coach.

No more than four 0.5 units of physical education credit may count toward the degree. One-unit courses are exempted from this limitation.

Beginning classes assume no prior experience. Those who think they qualify for an intermediate or advanced section should register for it. However, they should be prepared to drop it after the first class if the instructor thinks they are not ready for that level of work.

For more information, please contact the Associate Director Athletics for Physical Education, Kathy Campbell, at 845-437-7460.

Physics and Astronomy

ASTRONOMY

The astronomy major accommodates students interested in careers in professional astronomy as well as those who wish to combine a strong background in astronomy with specialization in another field. Except at the introductory level, astronomy courses have small enrollments (5 to 10 is typical) and students have good access to faculty as well as instrumentation. Recent graduates have gone on to graduate astronomy programs at Caltech, UCLA, University of Maryland, Columbia, Boston University, New Mexico State University, Indiana University, and University of Florida.

Other recent astronomy graduates are pursuing careers in such diverse fields as physics, government, secondary education, law, engineering, media consulting, journalism, computing, finance, medicine, music, and drama.

Those interested in astronomy should consider enrolling in Astronomy 101 in the fall semester or 105 in the spring semester. These introductory courses survey many areas of modern astronomy and presume little mathematical or scientific background. They also satisfy the quantitative analysis requirement. Students with some background in science and calculus may wish to consider Introduction to Observational Astronomy (Astronomy 240—also in the spring), with special permission. First-year students with an interest in majoring in astronomy should consult with the department at their earliest convenience and consider electing physics and calculus in their first semester. Such students may contact Professor Debra Elmegreen (elmegreen@vassar.edu) over the summer by email to elmegreen@vassar.edu, even prior to course selection.

The Class of 1951 Observatory houses a 32-inch telescope and a 20-inch telescope, each computer-controlled and equipped with an electronic camera. A high-resolution spectrograph and various small telescopes, including a solar telescope, are also at the site. We support a program of monitoring variable objects (such as quasars and stars with extrasolar planets) by student observers at the observatory. Research is also done during the academic year and during the summer (through the URSI program) using data from the Hubble Space Telescope, ALMA, and other national observatories. Recent student-faculty research projects have included work on the structure of galaxies, including galaxies in the early universe, protoplanetary disks, exoplanet searches, stellar spectroscopy, and mass transfer binaries. Much of the analytical work on these projects is done on department computers optimized for image processing.

Because astronomy is a relatively small field, the department at Vassar finds it important to maintain strong ties with other schools and programs. We have a strong tradition of student participation at astronomy meetings off-campus. Vassar participates in the Keck Northeast Astronomy Consortium of eight liberal arts institutions, a group that exchanges summer research students, hosts an annual symposium, and collaborates on several research projects.

America’s first woman astronomer, Maria Mitchell, was also the first director of the original Vassar College Observatory, now an historical landmark on campus. She believed astronomical education is best accomplished when students do their own research, and that students work best when they are part of a supportive scientific community. The department today works to maintain Maria Mitchell’s legacy.

PHYSICS

The curriculum of the physics major is designed to satisfy the needs of students with various goals, including both majors and non-majors. A rigorous course selection is available for those interested in physics, astronomy, or engineering (students may apply for a dual degree with the Thayer School of Engineering at Dartmouth) as well as for pre-medical

students, other science majors, or students electing a correlate sequence in physics. Courses are also available for those students with an interest in learning about the ideas of physics with a less quantitative approach. Students interested in biophysics should consult with Professor Magnes or Professor Sheung, and students interested in physics education should consult with Professor Schwarz, for advice on appropriate courses.

First-year students who are interested in majoring in physics should elect Physics 113/114 in their first year (or other physics courses, as determined by advanced placement), as well as an appropriate mathematics course. First-year students who have not taken calculus must enroll in calculus concurrently with physics. Physics 113/114 are appropriate both for potential physics majors as well as those planning possible majors in other sciences and for pre-medical students. Although it is possible to complete the requirements for the physics major by starting in the sophomore year, it is extremely difficult if physics and mathematics are not elected in the first year. Interested students are strongly encouraged to work closely with a department advisor in planning their program.

Students who receive a score of 4 or 5 on the Physics 1 exam will receive one unit of AP credit. Students taking the Physics C Mechanics exam or Physics C Electricity and Magnetism exam will receive 0.5 units of credit each for a score of 4 or 5. Students with AP Physics, IB Physics, or A-level Physics credit should plan on Physics 114 or Physics 200 as their first course. Placement into Physics 114 or Physics 200 or other upper-level physics courses will be determined through an online placement exam, available from June 15 through July 15 at <http://physicsandastronomy.vassar.edu/physics/placement.html>. Those taking the test will hear from a faculty member regarding the results and advice on course selection within seven days of taking the test. Students are strongly encouraged to take the exam before selecting your courses. Additional placement issues should be addressed by consultation with the department during departmental advising during orientation. Students who have any questions over the summer about placement may contact Professor Debra Elmegreen (elmegreen@vassar.edu) prior to selecting courses.

Special note to pre-medical students: The department recommends that students seeking admission to medical school enroll in Physics 113/114 at Vassar or an equivalent physics course at another institution. Students who receive AP physics credit should discuss pre-med fulfillment of the laboratory requirement with the director of fellowships and pre-health advising.

The department also offers courses primarily for non-science majors. In 2018/19, we offer A Tour of the Subatomic Zoo (Physics 168). Other courses that will be offered in future years include: Lasers, Technology, and Teleportation (Physics 152), 20th-Century Revolutions in Physics (Physics/STS 105), and Relatively Uncertain: A History of Physics, Religion, and Pop Culture (Physics/Religion/Science, Technology, and Society 160).

There are opportunities in the department for research collaboration and thesis work with faculty in fields including

physics education, ultrafast laser physics, atomic, molecular and optical physics, and biophysics. Summer research with faculty is available through Vassar's Undergraduate Research Summer Institute (URSI).

For more information, please visit <http://physicsandastronomy.vassar.edu>.

Political Science

Politics, the pursuit and exercise of power, exists in many realms of social life—not just in government but in businesses, religious institutions, universities, clubs, the media, and families. The academic discipline of political science focuses mainly on the politics of states (governments), including their political relations with members of society and with one another. It examines the sources, distribution, and exercise of power; the roles of class, race, and gender; the dynamics and impact of social movements; the political attitudes and behaviors of individuals and groups; the functioning of domestic and international political institutions; the relations among states, nations, and other actors in the international system; political beliefs, values, and ideologies; mass media and communications; the place of legal systems in domestic and international politics; major issues of public policy such as affirmative action, reproductive rights, and access to health care; human rights, immigration, welfare reform, and governmental budgets; and major global issues such as war, the economy, and the environment.

Four one-semester courses corresponding to the major fields of political science are offered at the introductory level: American Politics (Political Science 140), Comparative Politics (Political Science 150, political systems outside the U.S.), International Politics (Political Science 160, the relations among nations), and Political Theory (Political Science 170, political philosophy). First-year students planning to major in political science would normally elect one introductory course. This fulfills the introductory level requirement for concentration in political science. Students are allowed to count up to two units at the 100-level in political science toward the major.

A concentration or major in political science not only serves the purposes of a liberal arts education but is especially relevant to careers in law, business, finance, governmental service at all levels, politics, teaching, and political journalism. Opportunities exist for internships and practical experience outside the college in such settings as the United Nations, Capitol Hill, law offices and courts, and political campaigns, and for study abroad in Africa, Asia, Europe, Latin America, or the Middle East.

For more information, please visit <http://politicalscience.vassar.edu>.

Psychological Science

The Psychological Science Department has one introductory course, Psychology 105, which is taught either as a traditional survey or as a special topics course. Introduction to Psychology: A Survey introduces the student to fundamental psychological processes, their nature and development, and contemporary methods for their study through a

survey of the major research areas in the field. Introduction to Psychology: Special Topics offers the same basic content as the survey course, but views the research areas of psychological science through a topical lens. Special topics for Psychology 105 in 2018-9 will be the *Health and Happiness* (fall) and *Sex on the Brain* (spring). The department also offers a First-Year Writing Seminar, Psychology 108—Reading and Writing in Psychology. The topic of this year's writing seminar, offered in the fall semester, will be *Living Rhythms*.

Consideration of advanced course placement in 200-level courses is available only to students who have completed an introductory course in psychology at a college or university. Such students should submit the syllabus and description of the text used in the course, as well as an official transcript to the department chair for approval. A high school course in psychology does not qualify a student for advanced course placement. An AP examination in psychology similarly does not qualify a student for advanced course placement into 200-level courses. In addition, an AP examination in statistics does not meet the requirement for the statistics course in psychology. A college-level course must have been taken, and the syllabus and description of the course must be submitted to and approved by the department chair.

A wide range of intermediate-level course offerings is available covering the major sub-areas of the diverse field of psychological science. These include clinical, developmental, evolutionary/comparative, health, individual differences, learning and behavior, physiological, and social psychology.

Students interested in majoring in Psychological Science or pursuing advanced coursework should consult with the department and obtain a copy of the Psychological Science Major's Handbook. For more information, please visit the Psychological Science website (psychologicalscience.vassar.edu), or contact the Department Chair, Professor Trumbetta (845-437-7646 or trumbetta@vassar.edu).

Religion

In the Religion Department we examine in rigorous ways the most profound issues that human beings face, issues such as building community, understanding suffering and pain, searching for the ethical life or finding a sense of faith or meaning. The academic study of religion is an interdisciplinary exploration of these issues as well as of other phenomena we call "religious" around the world. Faculty in our department use historical methods to understand how religious communities and practices change over time; they use comparative methods to analyze ritual, popular culture, race, gender, media and material culture in different settings; and they employ sociological, psychological, and anthropological methods to study how religiosity shapes social and individual life. Our classes critically explore the complexities of religion around the globe, looking at how religion plays a key role in today's urgent political and social problems. Because of the interdisciplinary nature of our department,

we particularly welcome double majors and students working in related fields.

For more information, please visit <http://religion.vassar.edu>.

Russian Studies

In 1907, Vassar College became the first among the original Seven Sisters colleges to offer a course on Russian history. In 1939, again first among its peers, Vassar instituted regular courses in Russian. At present, the Department of Russian Studies offers a well-rounded curriculum that includes three years of language instruction and a wide range of literature and culture courses taught both in Russian and in English.

Every fall the department conducts a semester-long junior year abroad program in St. Petersburg that offers our students unique access to the cultural treasures of Russia's imperial capital.

First-year students with no previous knowledge of the Russian language may elect Elementary Russian (Russian 105-106) or the one-semester Intensive Russian (Russian 107) that covers the same amount of material in a more concentrated fashion. The department gives an oral and written examination to students with previous knowledge of Russian for the purpose of satisfying the Foreign Language Proficiency requirement, for placement into intermediate or advanced courses, and for a possible 2 units of credit. Please be sure to attend the departmental advising session during the orientation period.

In 2018/19 first-year students may also enroll in one or more of the courses given entirely in English translation. In the first semester we offer four such courses: The Russian Classics (RUSS 135); The Great Utopia: Ideals and Realities of the Russian Revolution (RUSS 169); Russia and the Short Story (RUSS 171), a First-year Writing Seminar; Vampires, Monks, and Holy Fools: The Mystical in Russia and Eastern Europe (RUSS 168).

In the second semester we teach four semester-long courses in English that are open to first-year students: Dostoevsky and Psychology (RUSS 141); Beyond the Looking Glass: Nonsense and Absurd in Russian and European Literature and Visual Arts (RUSS 172); The Genius of Chekhov: Theatre and Tales (RUSS 143); Women in Russian Arts: The Power and the Glory (RUSS 173), a First-year Writing Seminar. In addition, first-year students will also be able to enroll in one of the six-week courses offered by the department: The Cinema of Sergei Eisenstein (RUSS 156) and The Cinema of Andrei Tarkovsky (RUSS 154) focusing on two Russian film giants of the 20th century. Descriptions for all these courses are available in the college catalogue.

Students who are considering the option of majoring in Russian are urged to begin the study of the language in their first year, continuing with intermediate and advanced language courses in their sophomore and junior years. For those who will be starting their language study here, this sequence is mandatory unless one of these levels is covered in an accredited summer program. However, those who have taken Russian in high school or have a knowledge of

the language from home should sign up for a placement test that will indicate the appropriate level at which they should enroll.

Every semester the department offers a specialized course on a literary or cultural topic given entirely in Russian; access to such courses is open to students who have completed advanced Russian or have the equivalent language competency. Additionally, most courses taught in English have a supplementary section with readings in Russian.

Students can benefit from participation in the weekly Russian tea, from conversations with the native speaker who serves as the departmental language fellow, and from many other extracurricular activities.

The department has established the Masha N. Vorobiov Prize, which is awarded each spring to a promising student of Russian who intends to pursue summer study of the language.

For more information, please visit <http://russian.vassar.edu>.

Science, Technology, and Society

The Science, Technology, and Society (STS) Program is a multidisciplinary program that studies science and technology in a social, cultural, and historical context. Established in 1971, it was one of the first programs of its kind at an undergraduate institution. Today, many graduate and a few undergraduate institutions have programs of a similar nature. As an undergraduate program, however, Vassar's is unusual in the flexibility it gives its majors and in the close relationship it fosters between students and faculty.

By taking a broad range of courses across the curriculum and within the program itself, the STS major learns how the interrelationships among science, technology, and society have developed, and what major figures in the sciences and humanities have thought about it. The STS program is designed to enable students to pursue three objectives: a) to understand the central role of science and technology in contemporary society; b) to examine how science and technology reflect their social, political, philosophical, economic, and cultural contexts; and c) to explore the human, ethical, and policy implications of current and emerging technologies.

Faculty who teach in the STS program are drawn from many departments in the college. Presently, there are faculty from anthropology, biology, chemistry, economics, history, philosophy, physics, political science, psychology, religion, and sociology. Adjunct instructors from the fields of the history of science and medical ethics also take part in the program.

STS majors continue on in an extremely broad range of professions. Recent graduates have entered law, medicine, public health, and policy making. Recent senior theses have addressed such topics as: "The Human Genome Patent Debate," "The Controversy over the Use of Transgenic Organisms in Agriculture," "Paradigms in Conflict: Technological Development in Rural India," and "Wireless Communication and the 21st-Century Employee."

First-year students who are interested in STS should consider taking a year of science, including at least one laboratory course, as well as Introductory Sociology (Sociology 151) and/or Introduction to Economics (Economics 102).

For more information, please visit <http://sciencetechnologyandsociety.vassar.edu>, or contact the Acting Director, David Esteban, daesteban@vassar.edu (until July 1 2018) or the director, Nancy Pokrywka, napokrywka@vassar.edu.

Self-Instructional Language Program (SILP)

The Self-Instructional Language Program allows well-motivated students to enroll in a program of supervised self-instruction in American Sign Language, Hindi, Irish/Gaelic, Korean, Persian, Portuguese, Swahili, Swedish, Turkish, and Yiddish.

For more information, visit <http://silp.vassar.edu> or contact the coordinator, Lioba Gerhardi (ligerhardi@vassar.edu).

Sociology

The Department of Sociology offers a diverse curriculum that deepens and broadens students' understandings of modern society through examination of social issues, social structures and culture, and social justice. Our courses can be understood in terms of six basic themes—social justice, inequality and difference, culture, public policy, globalization, and theory—and highlight distinct perspectives to focus on individuals as members of collective forms and groups including (but not limited to) families, age, class, gender/sexuality, and race/ethnicity/nation. Students who majored in sociology at Vassar have pursued careers in government, research, business, the media, social work, and a variety of nonprofit organizations. Others have gone on to pursue graduate study in law, health care, and sociology as well as in other academic or professional disciplines.

Our Introductory Sociology (Sociology 151) course explores major concepts and various approaches necessary for cultivating a sociological imagination; the theme of each section varies, although Sociology 151 may not be repeated for credit. First-year students are also invited to enroll in our First-Year Writing Seminars, which also vary thematically; this course can count toward the major but does not ordinarily satisfy the Introductory Sociology requirement.

Our 200-level courses in the department deal with an array of contemporary topics as well as with modern social theory and methods of sociological analysis. 300-level courses provide students with the chance to examine selected sociological topics in seminar settings. In addition, the department offers independent study or field work under the sponsorship of individual faculty members. In the senior year, students undertake individual work through a required, year-long senior thesis, which allows the student to plan and execute an original sociological investigation on a topic of his or her choosing.

Sociology requires 10.5 units for a major, and also offers a correlate sequence that allows students to combine a sequence of six sociology courses with a major in another discipline. Our faculty are pleased to advise first-year students, whether or not they are considering a sociology major. Students with questions about the department can email sociology@vassar.edu. Please explore the department website for more information about our faculty, course offerings, and others resources: <http://Sociology.vassar.edu>.

Spanish (see Hispanic Studies)

Urban Studies

As most of the world's population now resides in cities, suburbs, and metropolitan areas, virtually nowhere on Earth is immune from urban influences. The Urban Studies Program provides multidisciplinary perspectives on the forms and relationships of cities, global dynamics of urbanization, urban ways of life, urban design and architecture, and urban planning and policy. We encourage students to articulate and pursue their own intellectual goals within the major, or to develop a correlate sequence on urban issues to complement other majors. Our graduates have gone on to careers in urban planning, policy analysis, government service, public administration, urban design and architecture, human services, teaching, business, and many other fields.

First-year students should take Introduction to Urban Studies (Urban Studies 100), which examines different ways of understanding and intervening in urban space. Subsequently, those considering majors should enroll in Urban Theory (Urban Studies 200) to study important theoretical debates and to formulate original questions for investigation. Students may also take such intermediate courses as Making Cities (Urban Studies 230); Community Development (Urban Studies 237); Urban Space, Place, Environment (Urban Studies 250); Cities of the Global South (Urban Studies 252); Gender and Social Space (Urban Studies 270); Modern Architecture and Beyond (Urban Studies 273); and other URBS courses.

Majors specialize in two disciplinary clusters—such as art, geography, history, political science, and sociology—and go on to take a seminar on Advanced Debates in Urban Studies (Urban Studies 303) as juniors or seniors, which can be repeated for credit if the topic has changed. Previous advanced seminars have focused on such topics as “Greening the City,” “Plotting the Invisible City,” “Memory and the City,” and “Musical Urbanism.” A variety of other seminars are offered to advanced students. In addition, majors gain practical as well as theoretical expertise in urban studies through field work (Urban Studies 290).

Entering students with previous courses in urban studies may confer with the program for advice on advanced placement, although there is no standard AP test.

For more information, please visit <http://urbanstudies.vassar.edu> or email the program director, Tobias Armbrorst (toarmbrorst@vassar.edu) or the administrative assistant, Alison Mateer (almateer@vassar.edu).

OTHER USEFUL INFORMATION

The VCard

Vassar has a one-card identification card system. The VCard lets you into your dorm; serves as your library card; laundry card; Meal Plan card; VCash account as well as your V-Print account. Each student will also get funds to spend each semester at participating Arlington restaurants. This account is separate from your Meal Plan and VCash account on your Vcard and is called ‘Arlington Bucks’. When visiting any off campus participating merchant, these funds will be automatically used first when paying with your VCard. Once the \$100 in Arlington Bucks has been depleted, then any off campus merchant purchases will default to the funds in your VCash account.

First-year students receive their VCard during New Student Orientation. It is their key to the residence houses. It can also be used to purchase books and other items at the Vassar College Store using VCash.

The VCard also carries the meal plan account; a meal plan is required for every student. Specifics about the meal plan can be found at the dining website <http://dining.vassar.edu/>.

The VCash account is on your VCard as well, which is also a prepaid account; this account is used for laundry machines in the dorms, the copiers and printers across campus (when your Vprint quota runs out), vending machines, purchases at the Computer Store and Vassar College Store, 20 participating local off-campus businesses, as well as any eatery on campus.

VCash can be deposited either online at card.vassar.edu using Visa, Mastercard or American Express...**or by going to the Service Desk (located in College Center) during the first month of every semester and charging VCash home to your student bill.**

The VCard carries a VPrint account, credited once per semester with \$32.50 (the equivalent of 650 prints) at no charge to you. If you exceed this limit the system will automatically start deducting from your VCash account for printing.

For more information or for a list of the participating businesses off-campus, please visit card.vassar.edu.

Victorian Studies

The Program in Victorian Studies enables students to combine courses offered in several departments with independent work and, through an interdisciplinary approach, to examine the assumptions, ideas, ideals, institutions, society, and culture of Victorian Britain, which was at the height of its power as a global empire in the nineteenth century.

First-year students considering a possible Victorian Studies major or correlate sequence are encouraged to consult with the Victorian Studies coordinator or any of the advisors. The intellectual foundation for the major is best laid by taking “Revolution, Evolution, and the Global Nineteenth Century” (Victorian Studies 150) as well as survey courses or 100-level courses in at least three of the departments involved in this interdisciplinary program.

A grounding in English literature and history is expected, and potential majors would do well to take English literature courses as well as “British History: James I (1603) to the Great War” (History 151). Students interested in the study of nineteenth-century art should enroll in Art 105-106 in their first year.

For more information, please visit <http://victorianstudies.vassar.edu> or email zlotnick@vassar.edu.

Women's Studies

The Women's Studies Program at Vassar brings together faculty who share the conviction that gender and sexuality are fundamental categories of analysis across disciplines. As a multidisciplinary field, women's studies teaches students to think critically about the multiple, intersecting systems of power through which sexual and gendered identities are constructed, and to engage with real-life political and ethical issues from diverse perspectives. The program offers courses that examine the lives and experiences of women in a variety of historical, cultural, and political contexts, as well as courses that explore the intersections of feminist theory, queer theory, and activism.

First-year students interested in women's studies are encouraged to take WMST 130, Introduction to Women's Studies, a team-taught course offered each semester that serves as a foundation for future study. WMST 130 introduces students to multidisciplinary methodologies, feminist history, and theoretical debates, with a particular focus on the intersections of gender, race, class, and sexuality. Beyond the introductory level, regularly offered courses include Gender in American Popular Media (WMST 240), Topics in the Construction of Gender (WMST 241), Making Waves: Topics in Feminist Activism (WMST 245), Feminist Approaches to Science and Technology (WMST 277), Feminist Theory (WMST 250), and Global Feminism (WMST 251). A full list of courses can be found in the catalogue.

For more information, please visit <http://womensstudies.vassar.edu>, or contact the director, Barbara Olsen (baolsen@vassar.edu).

Banks

As you plan for your life in Poughkeepsie, you may be interested in a list of local banks. The college is not able to cash checks, but we do have an automated teller in the College Center. Put in place by Key Bank, the machine honors money cards for all NYCE members. Banks within one mile of Vassar are listed below:

Bank of America
11 Raymond Avenue
Poughkeepsie, NY 12603
845-452-2041

Key Bank
55 Burnett Boulevard
Poughkeepsie, NY 12603
845-471-6010

TD Bank
703 Main Street
Poughkeepsie, NY 12601
845-431-6104

Ulster Savings Bank
39 Burnett Boulevard
Poughkeepsie, NY 12603
845-454-7144

NOTE: Vassar College has no prior arrangements with any of the businesses listed above. These resources are listed here as a courtesy to families.

Mailroom Hours and Services

Monday through Friday, 9:00 am–7:00 pm when classes are in session, 9:00 am–4:30 pm during break periods. No retail postage sales available. No acceptance of personal outgoing letters or packages without postage affixed.

Shipping and Receiving

Mail and/or packages are delivered daily by the USPS, FedEx, UPS and DHL. While your carrier may have sent you an email stating your package has been delivered to Vassar, Mail Services and Receiving Department needs time to sort and process those packages for delivery to you. Package processing time may vary depending on incoming volume. However, we make every effort to have all packages processed and available for pick-up within 24 hours of receipt.

Please wait until you receive a pick-up confirmation email from Mail Room or Receiving before coming to the Mailroom or the Receiving Department.

When you give out your mailing address, please use the following format:

Recipient's Name
Box #####
Vassar College
124 Raymond Avenue
Poughkeepsie, NY 12604-####
(#### is the same as your box number)

Receiving hours are 8:00 am–12:00 pm, and 12:30–4:30 pm, Monday through Friday. The Receiving Department does not supply transportation from their offices to your dorm, so please plan how much to put in each box. You may begin shipping at the end of July. Please use only the name that will appear on your student ID. Perishable packages will be held for one week before disposal. Packages left at the end of the spring semester will be subject to disposal. Please contact Receiving at 845-437-5693 or email receiving@vassar.edu with questions.

Transportation and Automobile Regulations

The Vassar College Transportation Department provides shuttle transportation to JFK, LaGuardia, and Stewart airports at various times during the school year. Weeks prior to the October, winter, spring and summer breaks, the dates and times of the shuttle schedule are sent out in a campus wide email to all students. We also provide a free shuttle service to the Poughkeepsie train station at each of the academic breaks.

Each student is charged a fee for the airport trip. We only provide shuttle service from the campus to the airports; we do not provide shuttles from the airports to the campus. Many companies also offer transportation between Vassar and all major airports in this area.

All student vehicles driven or parked on campus must be registered. The Safety and Security Office (located at 2500 New Hackensack Road) is open on weekdays from 8:30 am to 4:30 pm for vehicle registration. There is a fee for registering a vehicle that will be charged to your Vassar account.

Cars belonging to first-year students are only allowed in the New Hackensack lot. They are not permitted anywhere else on campus without an unloading pass.

Vassar students are also able to take advantage of Zipcar's low rate car-sharing program. For more details or to sign up, please go to <http://zipcar.com/vassar>.

Vassar College Store Hours for Move-in Week, Fall 2018

The Vassar College Store is open Monday through Saturday. Please check the Vassar College Store website at collegestore.vassar.edu for specific hours.
